LIVE AD ACTIVITY

Ray On Solar Systems

Hyderabad · https://www.rayonsolarsystems.in/ · Ad data pulled 2026-10-21

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-21. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for Ray On Solar Systems is produced with:
python run_pipeline.py https://www.rayonsolarsystems.in/ "Ray On Solar Systems" --city Hyderabad

Executive summary. Ray On Solar Systems is running 1 live ad on Meta (Library ID 1107666674962232, started 13 October 2026) offering a 3kW solar system at a special price with subsidy - and the ad sends the click to Instagram, not to the company's website. The company is based in Visakhapatnam and is advertising into Telangana.

1	8 days	Instagram + generic fb.me link	Meta

Ray On Solar Systems
Running since **Oct 13, 2026** (8 days) | Library ID 1107666674962232

"Reduce Your Electricity Bills with Solar - 3kW Solar Power System Offer. Get your 3kW solar system at a special price with subsidy and long-term warranty support. (Ad destination links to the company's Instagram profile; the Get Quote button goes to a generic fb.me link.)"

Open the live ad

Where your ad clicks land

the funnel behind the spend

Destination type	Instagram + generic fb.me link
Destination	instagram.com/ray_on_solar_systems_ (ad creative link) and fb.me ('Get Quote')
What that means	A social profile is not a funnel. There is no lead capture, no quote form and nothing to retarget - and the site's own free-quote form sits unused while the ad pays for clicks.

What I found

read live, not guessed

! The live 3kW-offer ad (Library ID 1107666674962232, started 13 October 2026) sends Telugu solar buyers to an Instagram profile - not to rayonsolarsystems.in. A profile has no lead capture, no phone form and nothing to retarget.

- ! The ad's 'Get Quote' button goes to a generic fb.me link - the click never lands on a page that takes a name, a phone number or a bill amount.
- ! The site itself is a clean WordPress build with a free-quote form, on-grid/off-grid rooftop systems, PM Surya Ghar subsidy assistance and a real-time monitoring section - none of it is in the paid path.
- ! Visakhapatnam-based (Ravi Nagar, Naidu Thota, 530029) and advertising into Telangana - no Telangana service-area proof for the buyer the ad is aimed at.
- ! One live ad is the entire paid presence - no second creative, no retargeting, nothing to A/B test.

Recommended next steps

what I would do first

1	**Point the ad at the site's own quote page** The site already has a free-quote form and the PM Surya Ghar subsidy section - sending the 3kW-offer click there instead of Instagram turns the spend into measurable leads.
2	**Or build a dedicated 3kW offer page** A landing page carrying the ad's exact offer - special 3kW price, subsidy, long-term warranty - with name, phone and locality captured before any chat.
3	**Add Telangana-local proof** A service-area statement and named local installs turn a Visakhapatnam advertiser into a local option for the Telugu buyer.
4	**Test a second creative** One ad cannot tell you which message works - a subsidy-focused and an EMI-focused version against each other would.
