LIVE AD ACTIVITY

Punarvi Energies

Hyderabad · https://www.punarvienergies.com · Ad data pulled 2026-10-18

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-18. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for Punarvi Energies is produced with:
python run_pipeline.py https://www.punarvienergies.com "Punarvi Energies" --city Hyderabad

Executive summary. Punarvi Energies is running 2 active Navaratri-offer ads on Meta, both started 13 October 2026, both sending the click into a Facebook lead form. Behind the offer sits the strongest proof base in this market: MNRE-approved EPC, 79 MW installed and clients including IIIT Hyderabad, TGSPDCL, TSREDCO and HPCL.

Where your ad clicks land

the funnel behind the spend

Destination type	Facebook lead form
Destination	fb.me 'Get quote' (inside Facebook)
What that means	The click never reaches punarvienergies.com, so none of your 79 MW, your MNRE approval or your institutional clients appear in front of the person deciding whether to enquire.

What I found

read live, not guessed

- ! Both ads send the click into a Facebook lead form - your 79 MW of installed capacity, MNRE approval and clients like IIIT Hyderabad, TGSPDCL, TSREDCO and HPCL never appear in front of the person clicking.
- ! The phone number in the ad (7997667677) is a transposition of the number on your own site (7799757777). Worth checking before the offer closes on 20 October - calls may be going nowhere while the spend continues.
- ! You are the biggest spender in this set with the strongest references (11 MW Khammam ground-mount, 5 MW Parigi, 3 MW Jadcherla textiles, Google 5.0 from 26 reviews) - and the least ownership of the click.
- ! Both ads lead with price only. Nobody in your market is leading with '79 MW installed for TGSPDCL and IIIT Hyderabad' - that is an untested differentiator.

Recommended next steps

what I would do first

1	**Fix the number first** Align the ad phone with the site phone (7799757777) and add call tracking on both, so the Navaratri spend stops leaking.
2	**Send the click to your own proof** A landing page with the offer at the top and the MW-scale references below it converts better than a Facebook form - and it is yours to retarget.
3	**Lead with credentials, not just price** Test a second creative angle: '79 MW installed for TGSPDCL, IIIT Hyderabad and HPCL' against the price-led one.
4	**Capture the non-bookers** Pixel + retargeting for everyone who clicked and did not submit. At your spend that audience is the cheapest pipeline you are currently not using.
