LIVE AD ACTIVITY

Solox Energies

Hyderabad · https://solox.in · Ad data pulled 2026-10-18

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-18. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for Solox Energies is produced with:
python run_pipeline.py https://solox.in "Solox Energies" --city Hyderabad

Executive summary. Solox Energies is running 1 active ad on Meta, started 17 October 2026, with multiple versions of the same creative. It is the only advertiser in this Hyderabad set whose ad sends traffic to its own website - the rest send clicks into Facebook forms.

Open the live ad

Where your ad clicks land

the funnel behind the spend

Destination type	Own website
Destination	https://solox.in/ ('Book Now')
What that means	The right structure - the click reaches a page you own. The problem is what that page currently tells a homeowner who just clicked a paid ad.

What I found

read live, not guessed

! Your ad points at solox.in - that part is already right, and it is rarer in this market than it should be.

! But the page it lands on still reads '0+ MW' of renewable energy installed, '1+ projects' and '1+ years of cumulative team experience'. A homeowner who just clicked a paid ad reads that as a brand-new company, right next to your Rs. 0-down promise.

- ! The contact page displays contact@solox.in, but the form's own mailto still points at Sungosolarenergy@gmail.com - a leftover from the site template. Enquiries may not be reaching the inbox you advertise.
- ! One live ad, one creative, one audience. There is no second angle, no retargeting creative and no test structure behind it.
- ! Worth keeping: Google Analytics is already installed on the site, so traffic measurement exists - the gap is what happens after the click.

Recommended next steps

what I would do first

1	**Replace the placeholder numbers** Fill in real installed capacity, project count and years of experience - or remove the counters entirely. On a paid landing page, '0+ MW' costs more than it says.
2	**Repoint the enquiry form** Make the form deliver to contact@solox.in and add a backup address, so no paid enquiry can be lost to an old template email.
3	**Build the Rs. 0-down angle into a page** Turn the ad promise into a landing page section: Rs. 0 down, subsidy up to Rs. 78,000 handled end-to-end, free site visit - with the calculator next to it.
4	**Start testing creatives** Run 3-4 versions of the zero-down-payment angle (including Telugu) against the current one. You have analytics in place, so you will actually see the difference.

Verified contact details

read from the live site / ad

Email	contact@solox.in (form mailto: Sungosolarenergy@gmail.com)
