WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-23. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for Hydromo is produced with:

Executive summary. Hydromo - a water and wastewater treatment company by core trade - is running 2 active commercial-solar ads into Andhra Pradesh and Telangana, started 9 September and 11 October 2026. The newest click lands on an fb.me link inside Facebook; the site's own solar pages (solar-commercial, renewable-energy-solutions, solar-panel-installation-in-hyderabad) never see the paid traffic. No Google Ads advertiser record was checked for this report - that requires the full pipeline.

Where your ad clicks land

the funnel behind the spend

Destination type	Facebook Messenger link (fb.me)
Destination	fb.me 'Get quote' (inside Facebook)

What that means	The commercial-solar click opens Facebook, not hydromo.in. The site's solar service pages, its free-consultation form and its client proof stay invisible to the spend, and nobody who clicks without enquiring can be retargeted.

What I found

read live, not guessed

- ! Solar is a division of a water-treatment company - the site's own title is 'Best Water Treatment and Waste Water Management Company in India' - yet it is buying commercial-solar ads across AP & Telangana. The ads and the site's centre of gravity do not match, and a buyer comparing vendors will notice.
- ! Both solar ads route to fb.me links; hydromo.in's solar pages (solar-commercial, renewable-energy-solutions, solar-panel-installation-in-hyderabad) and its free-consultation form never see the paid click.
- ! The trust assets are enormous and unused in the ads: Toyota, ITC, Larsen & Toubro, TATA, GMR, Dr Reddy's, HPCL, Cyient, Avantel, GVK, Auro Realty, DPS and Ankura Hospital logos, plus IGBC and ISO certification and 2025 sustainability awards.
- ! Two solar ads only (9 Sep, 11 Oct), both commercial. Residential rooftop - where the Rs. 78,000 PM Surya Ghar subsidy drives most Hyderabad demand - has no creative at all.
- ! The site runs an active technical blog (hybrid solar sizing, cost and payback; STP electricity consumption) - real expertise that could feed retargeting content nobody is currently being retargeted into.

Recommended next steps

what I would do first

1	**Give the solar division its own front door**	Build a solar-first landing page on hydromo.in for the AP & Telangana commercial offer, with the Meta Pixel, and point both ads at it - so the division does not borrow trust from a water-treatment homepage.
2	**Spend the client list in the creative**	Toyota, ITC, L&T, TATA, GMR, Dr Reddy's - one line of named industrial references in a cold-storage or food-processing ad outperforms any generic savings claim.
3	**Open the residential angle**	One residential creative built around the Rs. 78,000 PM Surya Ghar subsidy would test a market your two commercial-only ads never touch.
4	**Turn the blog into retargeting fuel**	The hybrid-solar sizing/payback guide is exactly the content a clicked but unconverted commercial buyer should be retargeted with - once a pixel gives you that audience.
