LIVE AD ACTIVITY

Vanguard Energy

Hyderabad · https://vanguardenergy.in/ · Ad data pulled 2026-10-23

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-23. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for Vanguard Energy is produced with:
python run_pipeline.py https://vanguardenergy.in/ "Vanguard Energy" --city Hyderabad

Executive summary. Vanguard Energy is running 1 active Telugu Meta ad (Facebook), started 9 October 2026. The ad stacks up to Rs. 78,000 government subsidy, a Rs. 22,000 Vanguard offer and up to 100% finance, and pushes a free site visit and quote. The click lands on an fb.me link inside Facebook, so the spend never reaches vanguardenergy.in. No Google Ads advertiser record was checked for this report - that requires the full pipeline.

Where your ad clicks land

the funnel behind the spend

Destination type	Facebook lead form (fb.me)
Destination	fb.me (inside Facebook)
What that means	Every click opens a Facebook surface, not vanguardenergy.in. You own no pixel on the landing experience, you cannot retarget the people who clicked and did not enquire, and there is no page you can test a different headline or price on. With a single ad live there is also no second creative angle to learn from.

What I found

read live, not guessed

- ! The one live ad points to an fb.me link inside Facebook - the click never lands on vanguardenergy.in, so no pixel, no retargeting pool, no testable landing page.
- ! The ad's promise (Rs. 78,000 subsidy + Rs. 22,000 offer + up to 100% finance) is fully substantiated on the site - TGREDCO-empanelled supplier, on-grid rooftop EPC, net metering and solar-loan pages - but the paid traffic never sees any of that proof.
- ! Two domains are live (vanguardenergy.in and vanguardenergysystems.com) with two inboxes (info@ and a Gmail address) - a split identity that can send the same enquiry to two places or none.
- ! 1 ad, live since 9 Oct, all cold traffic. There is no retargeting ad behind it and no second creative to test the finance angle against the subsidy angle.
- ! The '100% finance' promise is the sharpest hook in the ad - and it is only measurable if the click lands on a page you own.

Recommended next steps

what I would do first

1	**Move the click onto a page you own** Point the ad at a dedicated Hyderabad landing page carrying the same Rs. 78,000 + Rs. 22,000 + 100% finance offer, an enquiry form and the Meta Pixel - so every click is measurable and retargetable.
2	**Install pixel + conversions API** One pixel plus the Conversions API gives you the audience of everyone who clicked but did not enquire - usually 10-20x the people who fill a form.
3	**Settle on one domain and one inbox** Publish vanguardenergy.in and info@vanguardenergysystems.com everywhere (ads, forms, footer) so an enquiry can never sit unread or land on the wrong domain.
4	**Give the finance angle somewhere to land** A simple EMI/loan section on the landing page turns the '100% finance' hook into a form fill instead of a dead-end fb.me click.

Verified contact details

read from the live site / ad
