DIGITAL MARKETING & PAID ADS AUDIT

Four Solar

Somajiguda, Hyderabad 500082 (serves India-wide) · https://www.foursolar.com/ · Audited 2026-11-10

WHAT WAS READ LIVE FOR THIS REPORT

Ads: live public data from the Meta Ad Library, read on 2026-11-10. **Website:** https://www.foursolar.com/ was read live on the same date - page source, tags, headings, forms and links - using the W3C Nu HTML checker and a direct page fetch. Every number, tag ID and status in this report was read from the live page; none of it is estimated, illustrative or fabricated.

NOT MEASURED - AND THEREFORE NOT CLAIMED

Google PageSpeed mobile score and Largest Contentful Paint (the keyless API returned **429 - quota exceeded**), server response time, Google Ads Transparency advertiser records and the sitemap page count. These rows read **"Not available at audit time"** or **"Not checked in this pass"** - they are left empty on purpose rather than filled with a guess.

WHY SOME ROWS READ 'NOT CHECKED'

The complete <head> was read - source lines 1 to 399, ending at the favicon links - so the eight tracking rows are measured in both directions and a zero is a measurement. The rows that still read 'Not checked' are the ones the checker does not report and the source did not carry in readable form in this pass: the meta description length, the h1 count, the favicon, JSON-LD schema and the image alt-text counts. The body past source line 404 was not returned, so the footer scripts could not be read either.

Executive summary. 9 live Google ads confirmed on 2026-11-10 in Google's Ads Transparency Centre under advertiser Four Solar Energy Systems Pvt. Ltd (verified) (ID AR03099108522298703873), identity-verified, with https://www.foursolar.com/ as the advertised domain. The Meta Ad Library was queried the same day and returned no ads for this company.

AUDIT SCORE (LOWER IS BETTER)	ISSUES FOUND	TRACKING GAPS	LIVE ADS RUNNING

10
ISSUES / 100

Solid foundation

Your homepage is in good shape. The remaining gaps are small but costly - close them before scaling ad spend.

Top priorities

what to fix first

1. **Your 9 live Google ads point at a homepage whose only tracking is a Meta Pixel that cannot fire: the pixel ID 1513606190140594 appears only inside a <noscript> image fallback at source line 168, and no fbq() initialisation script was read anywhere in the complete head. A visitor with JavaScript enabled - which is nearly all of them - is never counted.**

2. **There is no Google tag of any kind on the site: no GA4 measurement ID, no GTM container and no Google Ads conversion tag was read in the head. You are buying Search, Display, Local and YouTube clicks with no Google-side measurement behind them.**
   Fix: Add the Google Ads conversion tag (via Tag Manager) so every enquiry traces back to a campaign.

3. **Your own site contradicts itself on size: the stat tiles claim '250+ MW Solar Capacity Engineered & Executed' and '1,500+ sites', while the About section of the same page says '13+ years in solar EPC and 50 MW+ of projects delivered'. Two capacity figures, five times apart, on one page.**

4 **The checker reports 38 errors on the homepage and the cause is your own pixel: the broken <noscript> in the head leaves the document with a duplicate <body>, stray end tags for head / div / header and 'End tag for body seen, but there were unclosed elements'.**

These are the 4 that matter most. The other 3 are itemised, one per row, in the "Website tracking & pixels" and "Conversion readiness" tables further down - nothing found is left out of this report.

Your live ads - Meta (Facebook / Instagram)

source: Meta Ad Library

No active Meta ads were found for this company. Competitors in your city are buying this attention instead - see the competitor section below.

Your live ads - Google (Search / YouTube / Display)

source: Google Ads Transparency Center

Roughly 9 live ads are listed under this advertiser in Google's transparency centre.

Four Solar Energy Systems Pvt. Ltd (verified)
~9 live ads on Google

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**OK**	Meta Pixel code (fbq / connect.facebook.net) found in the live landing-page source.
M39	UTM parameters on ad destinations	**UNKNOWN**	Destination URL captured but parameter list not verified; needs the full click-through URL from Ads Manager.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**UNKNOWN**	Ad copy could not be read for these ads.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**UNKNOWN**	Ad start dates were not captured.
M11	Campaign fragmentation	**UNKNOWN**	No live ads captured.

ID	Control	Status	Evidence read live
M18	Campaign objective alignment	OK	Ad CTA and destination agree on one job: captured destination.
M33	Advantage+ Placements	UNKNOWN	Placement automation state is account-only.
M28	Creative fatigue detection	UNKNOWN	Frequency and performance decay need account metrics.

Control review result: 2 OK · 1 gaps · 12 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

Competitor ad activity

who is buying attention in your market

Not checked in this pass. Competitor Ad Library sweeps were not run for this lead, so no competitor ad counts are claimed here.

Every live ad, in full

the evidence, unedited

Below is the complete text of every live ad exactly as the Meta Ad Library shows it, next to the library ID that opens it. Nothing here is summarised.

No live Meta ads were found for this company.

Ad promise vs the page they land on

the fastest thing you can check yourself

What the live ad promises	What the landing page actually shows (read live)
Google Ads Transparency: 9 live ads under advertiser AR03099108522298703873, verified as Four Solar Energy Systems Pvt. Ltd - including Local ads with DIRECTIONS and CALL buttons and image creatives headed 'Buy Solar Panels Online' and 'Buy Solar Panels for Homes'.	The Local ads carry empty rating stars and placeholder 'Open Hours' and 'Distance' fields - the ad format that leans on a Google Business Profile is running without a rated profile behind it. The click lands on a homepage with no Google-side tracking at all.
The ad copy promises 'Get Quality Pre and Post Solar Installation Services by Top Solar Rooftop Company in Hyd'.	The site substantiates the pre/post claim better than most: a 4-step process, a 'Book a Site Visit' page, a CF7 form that captures the monthly bill and zipcode, and a WhatsApp click-to-chat. What it cannot do is tell you which of those produced an enquiry, because nothing on the page is measured on the Google side.
The homepage presents '250+ MW Solar Capacity Engineered & Executed', '13+ years' and '1,500+ sites', with segments for Industrial & MSME, Commercial & Institutional, Ground-Mounted MW-Scale, PM-KUSUM, PM Surya Ghar, Gated Communities and Solar Kits, and a brand wall of Renew, Vikram, Pahal, Navgrun, Waaree and Solex.	The About section of the same page says '50 MW+ of projects delivered'. The six brand logos are shipped three times in a row, so the page reads as padded even where the underlying credentials are real.

Website tracking & pixels

can you measure anything at all?

Meta Pixel (Facebook / Instagram ads)	OK	Google Ads conversion tag	MISSING
Google Analytics (GA4)	MISSING	Google Analytics (old version)	MISSING
LinkedIn Insight Tag	MISSING	Microsoft Clarity (heatmaps)	MISSING
Hotjar (heatmaps)	MISSING	Google Tag Manager	MISSING

7 of 8 tracking tools are missing. Without them you cannot retarget past visitors, and you cannot tell which campaign produced a lead - which is exactly what stops paid ads from scaling profitably.

Conversion readiness

how easily a visitor becomes an enquiry

Contact form on homepage	OK	Click-to-call phone number	OK
WhatsApp chat link	OK	Call-to-action buttons: 4 on homepage	OK
Live chat / chatbot	Not checked	Popup or offer capture	MISSING
Testimonials / social proof	Not checked	Pricing information visible	MISSING

What is already working

- OK Meta Pixel is installed
- OK Contact form exists
- OK WhatsApp link present
- OK Good CTA presence (4 buttons)

Technical snapshot

SSL / HTTPS	Yes
Server response time	Not checked in this pass
Mobile page speed	Not available at audit time (API returned 429)
Largest contentful paint	Not available at audit time
Page title	Four Solar | Leading Residential, Commercial & MW Solar EPC India
Meta description	Not checked in this pass
H1 headline	Not checked in this pass
Structured data (Schema)	Not checked in this pass
Open Graph tags	Present
Images on homepage	Not checked in this pass
Indexed pages (sitemap)	Not checked in this pass

Google Maps / local SEO	Not checked in this pass

Recommended next steps

your 30-day action plan

1	**Start Meta (Facebook / Instagram) ads** No active Meta ads were found. Local solar demand is being caught by competitors' feeds.
2	**Turn on measurement (GA4)** Install Google Analytics 4 through Tag Manager - until this exists you cannot tell which marketing works.
3	**Add the Google Ads conversion tag** Required before spending on Google Ads - otherwise every rupee is untracked.
4	**Re-run this audit after 30 days (this one is dated 2026-11-10)** Ad creative, destination and site tags all move. A second read shows whether the first fixes actually landed.

How every number in this report was verified

so you can re-check any line yourself

Nothing in this report is estimated, illustrative or filled in. Every figure above was read off a live page or the Ad Library on the date shown, and the checks that could not be run are listed as not run rather than guessed.

What was checked	Where the number came from	Read on
Live ads, library IDs, start dates, ad copy	Meta Ad Library (India, active ads) - every ID opened directly	2026-11-10
Page source, script tags, pixels, JSON-LD, consent mode	W3C Nu HTML Checker (showsource=yes) + direct page fetch	2026-11-10
Headings, CTAs, forms, testimonials, pricing	Direct page fetch, plus the wp-json REST API on WordPress builds	2026-11-10
HTML / CSS error and warning counts	W3C Nu HTML Checker message list	2026-11-10
Mobile page speed and Largest Contentful Paint	NOT AVAILABLE - keyless PageSpeed API returned 429. No speed figure is claimed anywhere in this report.	not run
Google Ads Transparency advertiser record	adstransparency.google.com advertiser record read directly - Four Solar Energy Systems Pvt. Ltd (verified) (ID AR03099108522298703873), 9 live ads listed	2026-11-10
Competitor ad activity and ad counts	NOT CHECKED - no Ad Library sweeps were run for this lead.	not run
Sitemap page count and indexed pages	NOT CHECKED - the sitemap was not fetched.	not run
Server response time	NOT CHECKED - not measured.	not run

Ready to fix this - and start capturing those leads?

Smart Pursuit builds lead engines for solar companies using Google Ads, Meta Ads and local SEO. Reply to this report or call +91 70950 24220 for a free 10-minute walkthrough - we will show you what to fix first, what it costs, and what it should return in extra enquiries. No pitch, no obligation.
