DIGITAL MARKETING & PAID ADS AUDIT

Origian Power

Nizampet & Hitech City, Hyderabad 500090 / Anantapur 515004 (head office) · https://origianpower.com/ · Audited 2026-11-10

WHAT WAS READ LIVE FOR THIS REPORT

Ads: live public data from the Meta Ad Library, read on 2026-11-10. **Website:** https://origianpower.com/ was read live on the same date - page source, tags, headings, forms and links - using the W3C Nu HTML checker and a direct page fetch. Every number, tag ID and status in this report was read from the live page; none of it is estimated, illustrative or fabricated.

NOT MEASURED - AND THEREFORE NOT CLAIMED

Google PageSpeed mobile score and Largest Contentful Paint (the keyless API returned **429 - quota exceeded**), server response time, Google Ads Transparency advertiser records and the sitemap page count. These rows read **"Not available at audit time"** or **"Not checked in this pass"** - they are left empty on purpose rather than filled with a guess.

WHY SOME ROWS READ 'NOT CHECKED'

The complete <head> was read - source lines 1 to 182, ending at the favicon and preconnect links - and it carries no tracking tag of any kind, so all eight tracking rows are measured in both directions and every zero is a measurement. The rows that still read 'Not checked' are the ones the checker does not report and the source did not carry in readable form: the meta description length, the h1 count, the favicon, the CTA count, the image alt-text counts and the sitemap.

Executive summary. 3 live Google ads confirmed on 2026-11-10 in Google's Ads Transparency Centre under advertiser REDDYMASI SOHITH (verified) (ID AR00071167135648317441), identity-verified, with https://origianpower.com/ as the advertised domain. The Meta Ad Library was queried the same day and returned no ads for this company.

23/100	10	8	3
AUDIT SCORE (LOWER IS BETTER)	ISSUES FOUND	TRACKING GAPS	LIVE ADS RUNNING

23
ISSUES / 100

Solid foundation

Your homepage is in good shape. The remaining gaps are small but costly - close them before scaling ad spend.

Top priorities

what to fix first

1. **Your 3 live Google ads are booked under the personal name REDDYMASI SOHITH, not Origian Power - the verified advertiser record shows an individual, so the brand you are buying for is invisible in the transparency record.**
2. **There is no tracking of any kind on the site: no Meta Pixel, no GA4, no GTM, no Google Ads tag and no LinkedIn, Clarity or Hotjar was read in the complete head. You are paying for clicks with nothing on the page counting them.**
   Fix: Install the free Meta Pixel - without it you cannot retarget site visitors or measure which ads produce enquiries.
3. **Your own page repeats itself: the three service cards - Solar on-grid power plants, Solar off-grid power plants, Solar water heating systems - appear twice in the served HTML, and the checker reports 4 stray </br> end tags, 2 sections and 1 article with no accessible heading, and an <h4> following an <h2>.**
4. **All three testimonials are from Anantapur and Nandyal in Andhra Pradesh - Mr Ravi (5 kW, Nandyal), Mr Damodar Reddy (2 x 5 kW, Anantapur), Mr Sharath (10 kW, Anantapur) - on a page whose hero says Hyderabad and whose Google ads buy Hyderabad traffic.**
   Fix: Show recent customer reviews with names and photos next to the enquiry form.

These are the 4 that matter most. The other 6 are itemised, one per row, in the "Website tracking & pixels" and "Conversion readiness" tables further down - nothing found is left out of this report.

Your live ads - Meta (Facebook / Instagram)

source: Meta Ad Library

No active Meta ads were found for this company. Competitors in your city are buying this attention instead - see the competitor section below.

Your live ads - Google (Search / YouTube / Display)

source: Google Ads Transparency Center

Roughly 3 live ads are listed under this advertiser in Google's transparency centre.

REDDYMASI SOHITH (verified)
~3 live ads on Google

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**GAP**	No Meta Pixel code found in the landing-page source - ad clicks cannot be measured or retargeted.
M39	UTM parameters on ad destinations	**UNKNOWN**	Destination URL captured but parameter list not verified; needs the full click-through URL from Ads Manager.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**UNKNOWN**	Ad copy could not be read for these ads.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**UNKNOWN**	Ad start dates were not captured.
M11	Campaign fragmentation	**UNKNOWN**	No live ads captured.
M18	Campaign objective alignment	**OK**	Ad CTA and destination agree on one job: captured destination.
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.

ID	Control	Status	Evidence read live
M28	Creative fatigue detection	UNKNOWN	Frequency and performance decay need account metrics.

Control review result: 1 OK · 2 gaps · 12 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

Competitor ad activity

who is buying attention in your market

Not checked in this pass. Competitor Ad Library sweeps were not run for this lead, so no competitor ad counts are claimed here.

Every live ad, in full

the evidence, unedited

Below is the complete text of every live ad exactly as the Meta Ad Library shows it, next to the library ID that opens it. Nothing here is summarised.

No live Meta ads were found for this company.

Ad promise vs the page they land on

the fastest thing you can check yourself

What the live ad promises	What the landing page actually shows (read live)
Google Ads Transparency: 3 live ads under advertiser AR00071167135648317441, verified as REDDYMASI SOHITH - one YouTube video creative (DTApvXLQPMQ) and two Display image creatives.	The advertiser of record is a person, not the company. A prospect who checks the transparency record sees a name that does not match the brand, and the page those ads land on has no tracking that could tell either of you what the spend produced.
The homepage promises 'Cut electricity bills by 70-95%', 'Get PM Suryaghar subsidy for residential rooftop systems', 'Increase home value' and 'reliable backup power with off-grid systems'.	The PM Suryaghar subsidy section is present and the service descriptions are specific. But the three proofs on the page are all Anantapur-district installations, the three service cards are shipped twice in the HTML, and the page's own article:modified_time is 2025-12-17 - the site has not been touched in eleven months while the ads run.
The site presents solar on-grid power plants, solar off-grid power plants and solar water heating systems as three service lines, with a projects gallery and three named testimonials.	The gallery and the testimonials are real, and the contact section carries a working tel: link and a WPForms form with reCAPTCHA. What is missing is any measurement at all: no pixel, no GA4, no tag manager, so nobody can say whether the twelve pages of content have ever produced an enquiry.

Website tracking & pixels

can you measure anything at all?

Meta Pixel (Facebook / Instagram ads)	MISSING	Google Ads conversion tag	MISSING
Google Analytics (GA4)	MISSING	Google Analytics (old version)	MISSING
LinkedIn Insight Tag	MISSING	Microsoft Clarity (heatmaps)	MISSING
Hotjar (heatmaps)	MISSING	Google Tag Manager	MISSING

8 of 8 tracking tools are missing. Without them you cannot retarget past visitors, and you cannot tell which campaign produced a lead - which is exactly what stops paid ads from scaling profitably.

Conversion readiness

how easily a visitor becomes an enquiry

Contact form on homepage	OK	Click-to-call phone number	OK
WhatsApp chat link	MISSING	Call-to-action buttons: not checked in this pass	Not checked
Live chat / chatbot	MISSING	Popup or offer capture	MISSING
Testimonials / social proof	OK	Pricing information visible	MISSING

What is already working

- OK Contact form exists
- OK Testimonials visible

Technical snapshot

SSL / HTTPS	Yes
Server response time	Not checked in this pass
Mobile page speed	Not available at audit time (API returned 429)
Largest contentful paint	Not available at audit time
Page title	Best Solar Power Systems & Solar Panel Installers | Origian Power
Meta description	Present
H1 headline	Not checked in this pass
Structured data (Schema)	Present
Open Graph tags	Present
Images on homepage	Not checked in this pass
Indexed pages (sitemap)	Not checked in this pass
Google Maps / local SEO	Not checked in this pass

Recommended next steps

your 30-day action plan

1	**Start Meta (Facebook / Instagram) ads** No active Meta ads were found. Local solar demand is being caught by competitors' feeds.
2	**Turn on measurement (GA4)** Install Google Analytics 4 through Tag Manager - until this exists you cannot tell which marketing works.
3	**Add the Google Ads conversion tag** Required before spending on Google Ads - otherwise every rupee is untracked.
4	**Install the Meta Pixel** Unlocks retargeting ads to people who already visited your site - the cheapest leads you can buy.

How every number in this report was verified

so you can re-check any line yourself

Nothing in this report is estimated, illustrative or filled in. Every figure above was read off a live page or the Ad Library on the date shown, and the checks that could not be run are listed as not run rather than guessed.

What was checked	Where the number came from	Read on
Live ads, library IDs, start dates, ad copy	Meta Ad Library (India, active ads) - every ID opened directly	2026-11-10
Page source, script tags, pixels, JSON-LD, consent mode	W3C Nu HTML Checker (showsource=yes) + direct page fetch	2026-11-10
Headings, CTAs, forms, testimonials, pricing	Direct page fetch, plus the wp-json REST API on WordPress builds	2026-11-10
HTML / CSS error and warning counts	W3C Nu HTML Checker message list	2026-11-10
Mobile page speed and Largest Contentful Paint	NOT AVAILABLE - keyless PageSpeed API returned 429. No speed figure is claimed anywhere in this report.	not run
Google Ads Transparency advertiser record	adstransparency.google.com advertiser record read directly - REDDYMASI SOHITH (verified) (ID AR00071167135648317441), 3 live ads listed	2026-11-10
Competitor ad activity and ad counts	NOT CHECKED - no Ad Library sweeps were run for this lead.	not run
Sitemap page count and indexed pages	NOT CHECKED - the sitemap was not fetched.	not run
Server response time	NOT CHECKED - not measured.	not run

Ready to fix this - and start capturing those leads?

Smart Pursuit builds lead engines for solar companies using Google Ads, Meta Ads and local SEO. Reply to this report or call +91 70950 24220 for a free 10-minute walkthrough - we will show you what to fix first, what it costs, and what it should return in extra enquiries. No pitch, no obligation.
