Solid foundation

Your homepage is in good shape. The remaining gaps are small but costly - close them before scaling ad spend.

Top priorities

what to fix first

1. **Your 14 live Google ads are booked under a different legal entity: the verified advertiser record reads ECOILA PRIVATE LIMITED, not Green Carbon Hub. Anyone who checks the transparency centre sees a company name that does not match the brand on the ad.**
2. **Your <title> is 'GreenCarbonHub' - 14 characters with no service, no city and no offer - and your meta description element is shipped with an empty content attribute. Both Google ads are buying 'solar rooftop service providers in Hyderabad' and 'subsidy up to Rs 78,000' into a page that says neither.**
   Fix: Write a 150-character meta description with your city + service keyword to lift Google click-through.
3. **The only tracking on the site is GTM container GTM-TX4XRLT and Meta Pixel 1088807282778475. A container is not a measurement - no GA4 measurement ID could be read inside it - so 14 Google ads and 2 Meta ads run with no confirmed analytics behind them.**
4. **The second phone number on your site dials the first one: the offcanvas contact block renders '+91 9182445715' inside an <a href="tel:9182445300">. A buyer who taps the second number reaches the wrong line.**

These are the 4 that matter most. The other 6 are itemised, one per row, in the "Website tracking & pixels" and "Conversion readiness" tables further down - nothing found is left out of this report.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**OK**	Meta Pixel code (fbq / connect.facebook.net) found in the live landing-page source.
M39	UTM parameters on ad destinations	**UNKNOWN**	No ad destination captured.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**GAP**	Only 1 offer angle in live copy (bill savings) - every ad says the same thing.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**OK**	Live creatives include recent launches (newest started Sep 10, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	**OK**	2 distinct live ads visible - a comparison is at least possible.
M18	Campaign objective alignment	**UNKNOWN**	No funnel captured.
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.
M28	Creative fatigue detection	**UNKNOWN**	Frequency and performance decay need account metrics.

Control review result: 3 OK · 2 gaps · 10 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

Recommended next steps

your 30-day action plan

1	**Turn on measurement (GA4)** Install Google Analytics 4 through Tag Manager - until this exists you cannot tell which marketing works.

3	**Re-run this audit after 30 days (this one is dated 2026-11-10)** Ad creative, destination and site tags all move. A second read shows whether the first fixes actually landed.
4	**Book a 10-minute call to walk through this report** Bring the report - every line in it can be re-checked live while we talk.
