ISSUES / 100

Solid foundation

Your homepage is in good shape. The remaining gaps are small but costly - close them before scaling ad spend.

Top priorities

what to fix first

1. **Your entire website is invisible to everything that is not a browser: the served HTML is a React shell with a loader GIF, no h1, no headings, no form and no content. Google's crawler, the W3C checker, every link preview and every accessibility tool see an empty page.**
2. **You run about 8 live Meta ads - every one of them clicking through to fb.me, none to your own site - while your site carries no Meta Pixel. You are paying to reach people and then handing them to Facebook's messenger with no way to bring them back.**
   Fix: Install the free Meta Pixel - without it you cannot retarget site visitors or measure which ads produce enquiries.
3. **Your live ads contradict each other on your own history: Library ID 942037648839408 says '14 years of trust' while 1454295123168911 and 1541931104220931 say '15 years legacy'. Two ages, running at the same time.**
4. **GA4 (G-C58ZMRZ68Q) and GTM (GTM-NCP9G6SM) are both installed in the shell - real measurement that most leads in this market do not have - but there is no Meta Pixel and no Google Ads tag, so the one measurement you have covers the channel you do not buy.**
   Fix: Install the free Meta Pixel - without it you cannot retarget site visitors or measure which ads produce enquiries.

These are the 4 that matter most. The other 3 are itemised, one per row, in the "Website tracking & pixels" and "Conversion readiness" tables further down - nothing found is left out of this report.

Your live ads - Google (Search / YouTube / Display)

source: Google Ads Transparency Center

No Google Ads advertiser record was found for this company or domain. That means nobody is bidding on searches like 'solar panel price in Hanumakonda / Warangal 506001 (head office); Medipally, Hyderabad' in your name - a high-intent demand your competitors can take for free.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**GAP**	No Meta Pixel code found in the landing-page source - ad clicks cannot be measured or retargeted.
M39	UTM parameters on ad destinations	**UNKNOWN**	No ad destination captured.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**GAP**	All 5 live ads use a single format (image) - no format variety to test what converts.
M26	Creative concept coverage	**OK**	6 distinct offer angles in live copy: government subsidy, subsidy amount, EMI / financing, bill savings, experience claim, free site visit.

ID	Control	Status	Evidence read live
M30	Social proof utilization	GAP	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	UNKNOWN	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	UNKNOWN	Video performance metrics are account-only.
M31	UGC / social-native content	UNKNOWN	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	UNKNOWN	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	OK	Live creatives include recent launches (newest started May 29, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	OK	5 distinct live ads visible - enough running to compare messages against each other.
M18	Campaign objective alignment	UNKNOWN	No funnel captured.
M33	Advantage+ Placements	UNKNOWN	Placement automation state is account-only.
M28	Creative fatigue detection	UNKNOWN	Frequency and performance decay need account metrics.

Control review result: 3 OK · 3 gaps · 9 unknown (need account access) · 0 not applicable.

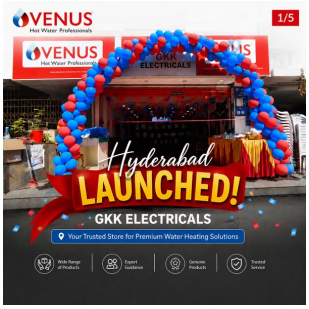

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

Website tracking & pixels

can you measure anything at all?

Meta Pixel (Facebook / Instagram ads)	MISSING	Google Ads conversion tag	MISSING
Google Analytics (GA4)	OK	Google Analytics (old version)	MISSING
LinkedIn Insight Tag	MISSING	Microsoft Clarity (heatmaps)	MISSING
Hotjar (heatmaps)	MISSING	Google Tag Manager	OK

6 of 8 tracking tools are missing. Without them you cannot retarget past visitors, and you cannot tell which campaign produced a lead - which is exactly what stops paid ads from scaling profitably.

Recommended next steps

your 30-day action plan

1	**Open a Google Ads channel** The Google Ads Transparency Centre was checked and shows no record for you, while competitors bid on the same 'solar + city' searches all day.
2	**Add the Google Ads conversion tag** Required before spending on Google Ads - otherwise every rupee is untracked.
3	**Install the Meta Pixel** Unlocks retargeting ads to people who already visited your site - the cheapest leads you can buy.
4	**Re-run this audit after 30 days (this one is dated 2026-11-10)** Ad creative, destination and site tags all move. A second read shows whether the first fixes actually landed.
