LIVE AD ACTIVITY

Ecolt Energy

Hyderabad · https://www.ecoltenergy.com/ · Ad data pulled 2026-10-21

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-21. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for Ecolt Energy is produced with:
python run_pipeline.py https://www.ecoltenergy.com/ "Ecolt Energy" --city Hyderabad

Executive summary. Ecolt Energy is running 2 live Telugu ads on Meta - both sharing one creative (Library ID 1405421181747986, started 13 October 2026) - selling a 3KW rooftop system at Rs. 1,90,000 with a Rs. 33,000 discount plus the Rs. 78,000 PM Surya Ghar subsidy, and every click lands in a Facebook lead form. The company has a Hyderabad office in Shaikpet (registered address Narasaraopet, AP) and a polished, calculator-driven website that receives none of the paid traffic.

"Telugu: ... ! ? Ecolt Energy Rooftop Solar . 3KW Rooftop Solar - Rs. 1,90,000. Rs. 33,000 . PM Surya Ghar Rs. 78,000 . , . Solar Estimate WhatsApp : +91 82475 37597. & . (3KW Rooftop Solar at Rs. 1,90,000 with a Rs. 33,000 special discount and PM Surya Ghar subsidy up to Rs. 78,000 - free solar estimate via WhatsApp.)"

Open the live ad

Where your ad clicks land

the funnel behind the spend

Destination type	Facebook lead form only
Destination	fb.me ('Sign up') on both ads
What that means	Every click is captured inside Facebook. The polished ecoltenergy.com - savings calculator, project map, WhatsApp chat - is invisible to the buyer the ad just paid for.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**UNKNOWN**	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	**GAP**	Live ads click to a Facebook lead form (fb.me) - traffic never reaches a page you own, so no URL can carry UTMs and click data stays inside Meta.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**OK**	3 distinct offer angles in live copy: government subsidy, subsidy amount, discount offer.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**OK**	Live creatives include recent launches (newest started Oct 13, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	**GAP**	A single live ad - no internal comparison, no safety net if it fatigues.
M18	Campaign objective alignment	**OK**	Ad CTA and destination agree on one job: Facebook lead form only.
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.
M28	Creative fatigue detection	**UNKNOWN**	Frequency and performance decay need account metrics.

Control review result: 3 OK · 3 gaps · 9 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

What I found

read live, not guessed

! 2 live Telugu ads - both sharing one creative (Library ID 1405421181747986, running since 13 October 2026) - and every click lands in a Facebook lead form. ecoltenergy.com receives none of the traffic.

! The ad's WhatsApp number (+91 82475 37597) is different from the site's (+91 83411 13782) - two numbers, two funnels, one brand.

! The live site's 'Real projects, real power' counters all read 0 - 0 MW capacity installed, 0 projects completed, 0 est. energy generated/yr, 0 CO2 offset/yr - while the hero banner claims 2,000+ systems installed and 95% average bill reduction.

! The site's live weather widget reads 'Right now in Virginia Beach: 16 deg C, clear skies' - hardcoded to a US city, on a Hyderabad solar company's homepage.

! The build is genuinely good (interactive bill-vs-solar comparison, savings calculator, project map across AP & Telangana) - none of it is in the paid path, and there is no pixel or retargeting pool from this spend.

Recommended next steps

what I would do first

1	**Point the ads at an owned page** A landing page on ecoltenergy.com carrying the ad's exact offer - 3KW at Rs. 1,90,000, Rs. 33,000 off, subsidy eligibility - so the spend builds one measurable funnel instead of a Facebook form.
2	**Fix the zero counters and the weather widget** 0 MW installed and 0 projects next to a '2,000+ systems' claim, plus a Virginia Beach widget, are the first things a paid visitor checks.
3	**Unify the phone numbers** The ad says +91 82475 37597, the site says +91 83411 13782. One number, everywhere, so the paid click and the site agree.
4	**Install pixel and retargeting** Two ads on one creative with no pixel means no audience to bring back and no way to see who dropped off after the click.
