LIVE AD ACTIVITY

Krisol Solar

Hyderabad · https://www.krisolsolar.com/ · Ad data pulled 2026-10-23

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-23. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for Krisol Solar is produced with:
python run_pipeline.py https://www.krisolsolar.com/ "Krisol Solar" --city Hyderabad

Executive summary. Krisol Solar is running 3 active Meta ads (Facebook and Instagram), all started between 16 and 21 October 2026. Two offer angles are live: the stacked Rs. 78,000 government subsidy + Rs. 22,000 Krisol discount, and the Rs. 3,000-20,000 monthly bill-saving story. Every ad's click lands on an fb.me link inside Facebook, so none of the spend reaches krisolsolar.com. No Google Ads advertiser record was checked for this report - that requires the full pipeline.

Where your ad clicks land

the funnel behind the spend

Destination type	Facebook Messenger link (fb.me)
Destination	fb.me 'Get offer' (inside Facebook)
What that means	Every click opens a Facebook surface, not krisolsolar.com. You own no pixel on the landing experience, you cannot retarget the people who clicked and did not enquire, and there is no page you can test a different headline or price on.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**UNKNOWN**	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	**GAP**	Live ads click to a Facebook lead form (fb.me) - traffic never reaches a page you own, so no URL can carry UTMs and click data stays inside Meta.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**OK**	6 distinct offer angles in live copy: government subsidy, subsidy amount, discount offer, bill savings, experience claim, installation speed.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**OK**	Live creatives include recent launches (newest started Oct 21, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	**OK**	3 distinct live ads visible - enough running to compare messages against each other.
M18	Campaign objective alignment	**OK**	Ad CTA and destination agree on one job: Facebook Messenger link (fb.me).
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.
M28	Creative fatigue detection	**UNKNOWN**	Frequency and performance decay need account metrics.

Control review result: 4 OK · 2 gaps · 9 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from

outside the account and are never guessed.

What I found

read live, not guessed

- ! All 3 live ads point to fb.me links inside Facebook - the click never lands on krisolsolar.com, so no pixel, no retargeting pool, no testable landing page.
- ! Your own site already has the pieces the ads need: a contact form, a 'Government Subsidy Available' popup form (name, phone, city, email, message), an FAQ that explains the Rs. 78,000 PM Surya Ghar subsidy, and a services carousel (rooftops, water heaters, street lights, pumps). None of the paid traffic ever sees any of it.
- ! The contact page lists krisolsolarinfra@gmail.com while the site footer publishes sales@krisolsolar.com - two inboxes for the same enquiry, so leads can land where nobody is watching.
- ! 3 ads, all launched within 5 days (16-21 Oct), all cold traffic. There is no second creative angle and no retargeting ad behind them yet.
- ! The 'Save Rs. 1 Lakh' stacked-offer ad is your sharpest hook and it is only 5 days old - the measurement to know which of the two angles works does not exist while the clicks stay inside Facebook.

Recommended next steps

what I would do first

1	**Move the click onto a page you own** Point all 3 ads at a dedicated Kompally landing page carrying the same Rs. 78,000 + Rs. 22,000 offer, an enquiry form and the Meta Pixel - so every click is measurable and retargetable.
2	**Install pixel + conversions API** One pixel plus the Conversions API gives you the audience of everyone who clicked but did not enquire - usually 10-20x the people who fill a form.
3	**Settle on one inbox** Publish sales@krisolsolar.com everywhere (ads, forms, footer) and retire or forward the Gmail address so an enquiry can never sit unread.
4	**Give the bill-saving angle somewhere to land** The Rs. 3,000-20,000/month story deserves a savings calculator or before/after bill section on the landing page - it is the ad's whole promise and today it dead-ends at fb.me.
