LIVE AD ACTIVITY

Orbit Solar

Hyderabad · https://orbitsolar.in/ · Ad data pulled 2026-10-22

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-22. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for Orbit Solar is produced with:
python run_pipeline.py https://orbitsolar.in/ "Orbit Solar" --city Hyderabad

Executive summary. Orbit Solar is the longest continuously-running advertiser in this batch: five live ads, the oldest started 6 November 2025 - residential ('They trusted us. You can too', 10 Dec 2025, six creatives), two commercial/industrial ROI ads (6 Nov 2025), an industrial Telangana ad (14 May 2026) and a new On-Grid Solar + UPS combo (4 Sep 2026). Every ad funnels to fb.me or WhatsApp - none points at a specific page on orbitsolar.in. The site itself (fetched 2026-10-22) claims MNRE-approved vendor status, carries residential and commercial brochures, a savings calculator and an enquiry form, and lists a Mehdipatnam address - none of which the ad copy uses beyond printing 'orbitsolar.in'.

"Unlock Massive Savings with Solar! Reliable Industrial Solar Solutions by Orbit Solar. 100+ Successful Installations across Telangana. Trusted by Businesses for performance & long-term savings. Sustainable Power, Proven ROI. Click below for a Free ROI Estimate!"

Open the live ad

Where your ad clicks land

the funnel behind the spend

Destination type	Split - fb.me links and WhatsApp
Destination	fb.me 'Sign Up' / 'Get quote' on the residential and UPS-combo ads; WhatsApp (wa.me/919059806772) on the commercial and industrial ads
What that means	No ad sends its click to a page on orbitsolar.in. The commercial and industrial spend - the highest-ticket offers - lands in a WhatsApp chat, and the residential spend lands behind an fb.me wrapper. The site's calculator, brochures and enquiry form sit outside the paid path entirely.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**UNKNOWN**	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	**GAP**	Live ads click to a Facebook lead form (fb.me) - traffic never reaches a page you own, so no URL can carry UTMs and click data stays inside Meta.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**OK**	6 distinct offer angles in live copy: government subsidy, bill savings, warranty, social proof, experience claim, installation speed.
M30	Social proof utilization	**OK**	Live ad copy carries a social-proof claim (customer count / testimonial framing).
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.

ID	Control	Status	Evidence read live
M-CR 1	Creative freshness	OK	Live creatives include recent launches (newest started Sep 4, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	OK	5 distinct live ads visible - enough running to compare messages against each other.
M18	Campaign objective alignment	OK	Ad CTA and destination agree on one job: Split - fb.me links and WhatsApp.
M33	Advantage+ Placements	UNKNOWN	Placement automation state is account-only.
M28	Creative fatigue detection	UNKNOWN	Frequency and performance decay need account metrics.

Control review result: 5 OK · 1 gaps · 9 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

What I found

read live, not guessed

- ! Five live ads and the oldest has run since 6 November 2025 - a year of continuous spend across residential, commercial and industrial angles, plus a new On-Grid + UPS combo (4 Sep 2026).
- ! Not one ad points at a page on orbitsolar.in - residential and UPS-combo ads go to fb.me, the commercial and industrial ads go straight to WhatsApp.
- ! The install-count claims differ across live ads: '1000+ installations across Hyderabad' (residential), '500+ Successful Installations Across Telangana' (commercial) and '1,000+ industrial clients across India' (industrial) - a prospect who sees two ads sees two different companies.
- ! No email address is published anywhere on the live site - enquiries only via the form (name, mobile, email, location, monthly bill), phone or WhatsApp.
- ! The newest offer - On-Grid Solar + UPS Combo with smart auto-switching - has no page of its own on orbitsolar.in; the ad is the only place it exists.

Recommended next steps

what I would do first

1	**Give each angle its own owned page** Residential, commercial/industrial and the new UPS combo are three different buyers. One landing page per angle on orbitsolar.in - each with its own form - turns a year of fb.me and WhatsApp spend into a funnel you own and can test.
2	**Reconcile the numbers** 1000+ installations, 500+ across Telangana and 1,000+ industrial clients cannot all be the headline. One verified number, used everywhere, is worth more than three that contradict.
3	**Publish an email** A business spending on Meta for a year with no email on its site loses every enquiry that prefers to write. A care@ address on the form, the footer and the ads.
4	**Build the UPS combo page** On-grid + UPS with auto-switching is a differentiated product with a live ad behind it - it deserves a page with the combo, the switching logic and the net-metering assistance explained.
