WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-22. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for Arcedo Systems is produced with:
python run_pipeline.py https://arcedo.net/ "Arcedo Systems" --city Hyderabad

Executive summary. Arcedo Systems runs three live ads on its 'Arcedo Systemss' page - a Telugu PM Surya Ghar subsidy-eligibility ad (23 Sep, fb.me), a Telugu residential ad carrying Suryon Solar Systems branding that points at solar.suryon.in (30 Sep), and an English commercial OPEX ad for factories pointing at a Messenger document (17 Oct). A sibling Facebook page named 'Suryon' runs the same brand's residential Telugu ads with Arcedo's own contact details in the copy (info@arcedo.net, 844 844 8552) - one company, two pages, two brand names. arcedo.net itself is the large-scale-PV EPC site (rooftop, ground-mount, floating, O&M); the ads sell Rs 78,000-subsidy homes and zero-capex factory OPEX.

Where your ad clicks land

the funnel behind the spend

Destination type	Split across three destinations
Destination	fb.me (Telugu subsidy ad), solar.suryon.in (Suryon-branded residential ad), fb.com/messenger_doc/ (commercial OPEX ad)
What that means	Three live ads, three different destinations - and not one of them is a page on arcedo.net. The residential click lands on a subdomain of a different brand name; the commercial click lands in a Messenger document. No single owned funnel, no shared page to test.

What I found

read live, not guessed

- ! Three live ads (23 Sep, 30 Sep, 17 Oct) with three different destinations: fb.me, solar.suryon.in and a Messenger document. None lands on arcedo.net.
- ! One company, two brands: the Telugu residential ad on the Arcedo page carries Suryon Solar Systems branding and points at solar.suryon.in, while a separate 'Suryon' Facebook page runs the same brand's ads with Arcedo's contact details (info@arcedo.net, 844 844 8552) in the copy.
- ! The commercial OPEX ad - the highest-ticket offer (solar + battery for factories, zero capex) - sends its click to a Messenger document rather than a page that explains the OPEX model.
- ! arcedo.net positions as a large-scale solar EPC (rooftop, ground-mounted, floating solar, O&M, MEP) while the ads sell Rs 78,000-subsidy homes and zero-capex commercial OPEX - the ad-to-site message match is weak in both directions.
- ! The company's empanelment credentials (TGREDCO empanelled supplier and TGNPDCL listed vendor, per the Telangana discom supplier lists) appear nowhere in the live ad copy.

Recommended next steps

what I would do first

1	**One brand, one funnel** Decide whether the residential buyer meets Arcedo or Suryon, then point every residential ad at one owned page on arcedo.net with the subsidy offer, the 25-year performance warranty and the free site visit on it.
2	**Give the OPEX offer a real page** Solar + battery at zero capex for factories is the highest-value offer in the account. A page with the OPEX model, the 50% bill-cut claim and the +91 844 844 8552 contact converts better than a Messenger document.
3	**Put the empanelment in the copy** TGREDCO-empanelled and discom-listed is the trust asset a subsidy buyer looks for - it belongs in the Telugu ad, not only in a supplier PDF.

Verified contact details

read from the live site / ad

Email	info@arcedo.net (site contact page; also in the Suryon-page ad copy)
Phone	+91 8448448552 (contact page + ads); +91 9866966678 (team page)
Address	3rd & 6th Floor, Trendz Techpark, Kakatiya Hills, Madhapur, Hyderabad 500081; 4th Floor 401, Vaishnavi Lamani Arcade, Doolapally Rd, Kompally, Hyderabad 500014
Entity	Arcedo Systems Private Limited - CIN U35105TS2025PTC193163, incorporated 21 Jan 2025, ROC Hyderabad (MCA records)

Credentials	TGREDCO empanelled supplier; TGNPDCL listed vendor (Telangana discom supplier lists)
Meta pages	facebook.com/61561703979379 ('Arcedo Systemss'); sibling page 'Suryon' facebook.com/61585616331903 runs the same brand's residential ads

Ready to fix this - and start capturing those leads?
