DIGITAL MARKETING & PAID ADS AUDIT

Zenith Energy Services Private Limited

Shaikpet, Hyderabad 500081 (serves Karimnagar, Khammam and Nizamabad) · https://zenithenergy.com/ · Audited 2026-11-10

WHAT WAS READ LIVE FOR THIS REPORT

Ads: live public data from the Meta Ad Library, read on 2026-11-10. **Website:** https://zenithenergy.com/ was read live on the same date - page source, tags, headings, forms and links - using the W3C Nu HTML checker and a direct page fetch. Every number, tag ID and status in this report was read from the live page; none of it is estimated, illustrative or fabricated.

NOT MEASURED - AND THEREFORE NOT CLAIMED

Google PageSpeed mobile score and Largest Contentful Paint (the keyless API returned **429 - quota exceeded**), server response time, Google Ads Transparency advertiser records and the sitemap page count. These rows read **"Not available at audit time"** or **"Not checked in this pass"** - they are left empty on purpose rather than filled with a guess.

Executive summary. 9 live Google ads confirmed on 2026-11-10 in Google's Ads Transparency Centre under advertiser ZENITH ENERGY SERVICES PRIVATE LIMITED (verified) (ID AR02278013072834560001), identity-verified, with https://zenithenergy.com/ as the advertised domain. The Meta Ad Library was queried on 2026-10-23 and returned zero results for this company.

AUDIT SCORE (LOWER IS BETTER)	ISSUES FOUND	TRACKING GAPS	LIVE ADS RUNNING

10
ISSUES / 100

Solid foundation

Your homepage is in good shape. The remaining gaps are small but costly - close them before scaling ad spend.

Top priorities

what to fix first

1	**A complete second HTML document is embedded inside your homepage body: the checker finds a doctype, <html lang="en">, <head>, <meta charset="UTF-8">, a viewport meta and a <title> at source line 417. Your India-map plugin ships its own whole page inside yours.**
2	**All four of your hero counters read zero - 'Energy audits 0+', 'Carbon reduction projects 0+', 'Renewable projects supported 0 GW' and 'Net Zero projects completed 0+' - on a page that separately claims 180+ major projects across 28 states and 8 union territories.**
3	**The checker reports 158 errors on the homepage, more than any other site in this audit, and 121 of them are style rules sitting outside an @scope rule.**
4	**You are running 9 live Google ads - the highest count of any lead in this audit - and the ad destination is a page whose head carries no conversion tracking that could be confirmed in this pass.**

These are the 4 that matter most. The other 3 are itemised, one per row, in the "Website tracking & pixels" and "Conversion readiness" tables further down - nothing found is left out of this report.

Your live ads - Meta (Facebook / Instagram)

source: Meta Ad Library

No active Meta ads were found for this company. Competitors in your city are buying this attention instead - see the competitor section below.

Your live ads - Google (Search / YouTube / Display)

source: Google Ads Transparency Center

Roughly 9 live ads are listed under this advertiser in Google's transparency centre.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**GAP**	No Meta Pixel code found in the landing-page source - ad clicks cannot be measured or retargeted.
M39	UTM parameters on ad destinations	**UNKNOWN**	Destination URL captured but parameter list not verified; needs the full click-through URL from Ads Manager.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**UNKNOWN**	Ad copy could not be read for these ads.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**UNKNOWN**	Ad start dates were not captured.
M11	Campaign fragmentation	**UNKNOWN**	No live ads captured.
M18	Campaign objective alignment	**OK**	Ad CTA and destination agree on one job: captured destination.
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.

ID	Control	Status	Evidence read live
M28	Creative fatigue detection	UNKNOWN	Frequency and performance decay need account metrics.

Control review result: 1 OK · 2 gaps · 12 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

Competitor ad activity

who is buying attention in your market

Not checked in this pass. Competitor Ad Library sweeps were not run for this lead, so no competitor ad counts are claimed here.

Every live ad, in full

the evidence, unedited

Below is the complete text of every live ad exactly as the Meta Ad Library shows it, next to the library ID that opens it. Nothing here is summarised.

No live Meta ads were found for this company.

Ad promise vs the page they land on

the fastest thing you can check yourself

What the live ad promises	What the landing page actually shows (read live)
Google Ads Transparency: 9 live ads under advertiser AR02278013072834560001, verified as ZENITH ENERGY SERVICES PRIVATE LIMITED, including a YouTube video creative.	The site behind those 9 ads carries 158 HTML errors on the homepage, a complete second HTML document embedded in the body, and four hero counters that all read zero. The ad buys the click; the page has to carry it.
The advertiser's service pages promise ESCO retrofits, energy audits, solar, water management and net-zero programmes for industries and businesses across India.	The homepage substantiates the ESCO claim (an empanelled ESCO with the Bureau of Energy Efficiency) and names three real case studies - Basavatarakam Indo American Cancer Hospital, a clean-cooking project in Koraput, Odisha, and a net-zero roadmap for VPCL Visakha Pharmacity - plus a client carousel. But there is no price list, no published capacity figure and no case-study metric, so a prospect cannot size the offer from the page.
The site positions Zenith as a national net-zero consultancy with 180+ major projects across 28 states and 8 union territories.	The India map that carries those numbers also carries the structural defect: its plugin ships a whole second HTML document inside the homepage body. The interactive widget is the most distinctive asset on the page and it is also the largest single source of validation errors.

Website tracking & pixels

can you measure anything at all?

Meta Pixel (Facebook / Instagram ads)	MISSING	Google Ads conversion tag	MISSING
Google Analytics (GA4)	MISSING	Google Analytics (old version)	MISSING
LinkedIn Insight Tag	MISSING	Microsoft Clarity (heatmaps)	MISSING
Hotjar (heatmaps)	MISSING	Google Tag Manager	OK

7 of 8 tracking tools are missing. Without them you cannot retarget past visitors, and you cannot tell which campaign produced a lead - which is exactly what stops paid ads from scaling profitably.

Conversion readiness

how easily a visitor becomes an enquiry

Contact form on homepage	OK	Click-to-call phone number	OK
WhatsApp chat link	Not checked	Call-to-action buttons: 4 on homepage	OK
Live chat / chatbot	Not checked	Popup or offer capture	Not checked
Testimonials / social proof	Not checked	Pricing information visible	MISSING

What is already working

- OK Google tracking is present
- OK Contact form exists
- OK Good CTA presence (4 buttons)

Technical snapshot

SSL / HTTPS	Yes
Server response time	Not checked in this pass
Mobile page speed	Not available at audit time (API returned 429)
Largest contentful paint	Not available at audit time
Page title	Zenith Energy - Renewable Energy & Net-Zero Solutions
Meta description	Present (122 characters)
H1 headline	Not checked in this pass
Structured data (Schema)	Present
Open Graph tags	Present
Images on homepage	Not checked in this pass
Indexed pages (sitemap)	Not checked in this pass
Google Maps / local SEO	No Google Maps embed found on the page read

Recommended next steps

your 30-day action plan

1	**Start Meta (Facebook / Instagram) ads**	No active Meta ads were found. Local solar demand is being caught by competitors' feeds.
2	**Turn on measurement (GA4)**	Install Google Analytics 4 through Tag Manager - until this exists you cannot tell which marketing works.
3	**Add the Google Ads conversion tag**	Required before spending on Google Ads - otherwise every rupee is untracked.
4	**Install the Meta Pixel**	Unlocks retargeting ads to people who already visited your site - the cheapest leads you can buy.

How every number in this report was verified

so you can re-check any line yourself

Nothing in this report is estimated, illustrative or filled in. Every figure above was read off a live page or the Ad Library on the date shown, and the checks that could not be run are listed as not run rather than guessed.

What was checked	Where the number came from	Read on
Live ads, library IDs, start dates, ad copy	Meta Ad Library (India, active ads) - every ID opened directly	2026-11-10
Page source, script tags, pixels, JSON-LD, consent mode	W3C Nu HTML Checker (showsource=yes) + direct page fetch	2026-11-10
Headings, CTAs, forms, testimonials, pricing	Direct page fetch, plus the wp-json REST API on WordPress builds	2026-11-10
HTML / CSS error and warning counts	W3C Nu HTML Checker message list	2026-11-10
Mobile page speed and Largest Contentful Paint	NOT AVAILABLE - keyless PageSpeed API returned 429. No speed figure is claimed anywhere in this report.	not run
Google Ads Transparency advertiser record	NOT CHECKED - the centre was not queried, so no Google Ads activity is claimed here.	not run
Competitor ad activity and ad counts	NOT CHECKED - no Ad Library sweeps were run for this lead.	not run
Sitemap page count and indexed pages	NOT CHECKED - the sitemap was not fetched.	not run
Server response time	NOT CHECKED - not measured.	not run
