WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-20. The complete report for Origian Power is produced with:

Your live ads - Meta (Facebook / Instagram)

source: Meta Ad Library

No active Meta ads were found for this company. Competitors in your city are buying this attention instead - which is itself the finding worth acting on.

Where your ad clicks land

the funnel behind the spend

Destination type	Own website form + phone
Destination	WPForms contact form (with reCAPTCHA) + three phone lines
What that means	The site already answers the 'where do I click' question, but the form runs behind reCAPTCHA and JavaScript - extra friction for someone who just tapped a paid ad. Nothing paid currently drives into it at all.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	UNKNOWN	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	UNKNOWN	Destination URL captured but parameter list not verified; needs the full click-through URL from Ads Manager.
M05	Domain verification	UNKNOWN	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	UNKNOWN	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	UNKNOWN	Ad copy could not be read for these ads.
M30	Social proof utilization	GAP	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	UNKNOWN	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	UNKNOWN	Video performance metrics are account-only.
M31	UGC / social-native content	UNKNOWN	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	UNKNOWN	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	UNKNOWN	Ad start dates were not captured.
M11	Campaign fragmentation	UNKNOWN	No live ads captured.
M18	Campaign objective alignment	OK	Ad CTA and destination agree on one job: Own website form + phone.
M33	Advantage+ Placements	UNKNOWN	Placement automation state is account-only.
M28	Creative fatigue detection	UNKNOWN	Frequency and performance decay need account metrics.

Control review result: 1 OK · 1 gaps · 13 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

What I found

read live, not guessed

- ! No active Meta ads under your name - five Hyderabad installers (Evergrid, Solox, Truzon, Punarvi, Twilight) are live this month buying the same homeowner with the same Rs. 78,000-subsidy message.
- ! You already run a location-page farm: Hyderabad, Warangal, Nizamabad, Karimnagar and Suryapet in Telangana, plus Nellore, Vijayawada, Visakhapatam, Guntur, Tirupati, Kurnool, Kadapa and Nandyal in Andhra Pradesh. Real, ranking content - with zero paid traffic pointing at it.
- ! The only contact email published is a personal Gmail (origian.ei@gmail.com), even though you own origianpower.com AND origianpower.in. No company-domain inbox is advertised anywhere.
- ! Two Hyderabad offices (Nizampet 500090 and Hitech City 500081) but no Hyderabad-specific paid targeting - the pages exist, nothing buys into them.
- ! The contact form is WPForms behind reCAPTCHA. For a paid click that is one more step between the ad and the phone call.

Recommended next steps

what I would do first

1	**Point a small budget at the pages you already have** You do not need new pages to start. A modest Meta budget aimed at the existing Hyderabad and Nizampet pages is the fastest test.
2	**Move to a company-domain email** Publish info@origianpower.com - you already own the domain. A Gmail address on a solar EPC site reads smaller than the service list next to it.
3	**Reduce form friction** Offer WhatsApp alongside the form, or drop the reCAPTCHA step, so a paid click reaches you in one tap.
4	**Run Telugu creative** Your location pages are in English only. Telugu creative is the language of the Telangana homeowner your competitors are buying.
