DIGITAL MARKETING & PAID ADS AUDIT

Rayzon Solar

Hyderabad · https://rayzonsolar.com/contact-us · Audited 2026-10-25

WHAT WAS READ LIVE FOR THIS REPORT

Ads: live public data from the Meta Ad Library, read on 2026-10-24. **Website:** https://rayzonsolar.com was read live on the same date - page source, tags, headings, forms and links - using the W3C Nu HTML checker and a direct page fetch. Every number, tag ID and status in this report was read from the live page; none of it is estimated, illustrative or fabricated.

NOT MEASURED - AND THEREFORE NOT CLAIMED

Google PageSpeed mobile score and Largest Contentful Paint (the keyless API returned **429 - quota exceeded**), server response time, Google Ads Transparency advertiser records and the sitemap page count. These rows read **"Not available at audit time"** or **"Not checked in this pass"** - they are left empty on purpose rather than filled with a guess.

Executive summary. Rayzon Solar is running 1 active Meta ad, started 13 October 2026. The creative is scheme-branded ('PM Surya Ghar') and the click goes to an Instagram profile - not rayzonsolar.com - so there is no landing page, no form and no pixel behind the spend. Rayzon is a Surat-based module manufacturer (Rayzon Solar Ltd, Millennium Business Hub, Varachha Road, with factories at Kim and Kosamba) whose site carries the proof stack the ad never shows: 6 GW capacity, ALMM listing, Ecovadis certificate and a 360-degree factory tour. Google Ads Transparency records were not checked in this pass.

AUDIT SCORE (LOWER IS BETTER)	ISSUES FOUND	TRACKING GAPS	LIVE ADS RUNNING

24
ISSUES / 100

Solid foundation

Your homepage is in good shape. The remaining gaps are small but costly - close them before scaling ad spend.

Top priorities

what to fix first

1	**Your live ad clicks through to instagram.com, not rayzonsolar.com - neither destination can be measured.**
2	**No Meta Pixel installed - can't run retargeting or track ad conversions** **Fix:** Install the free Meta Pixel - without it you cannot retarget site visitors or measure which ads produce enquiries.
3	**No Google Ads / GTM tracking - can't measure ad performance** **Fix:** Add the Google Ads conversion tag (via Tag Manager) so every enquiry traces back to a campaign.
4	**No Google Analytics - flying blind on website traffic** **Fix:** Set up GA4 - right now nothing records how many people visit, where they come from, or which pages convert.

These are the 4 that matter most. The other 3 are itemised, one per row, in the "Website tracking & pixels" and "Conversion readiness" tables further down - nothing found is left out of this report.

Your live ads - Meta (Facebook / Instagram)

source: Meta Ad Library

1 active ad results found. Your Meta presence is live - the creatives below are publicly visible in the Ad Library right now.

Rayzon Solar
Running since **Oct 13, 2026** (26 days) | Library ID 2046407626037554

"Scheme-branded creative reading 'PM Surya Ghar', linking to the Rayzon Solar Instagram profile."

Open the live ad

Your live ads - Google (Search / YouTube / Display)

source: Google Ads Transparency Center

Not checked in this pass. Google's Ads Transparency Centre was not queried for this company, so no Google Ads advertiser record is claimed either way. This is worth checking next: competitors bidding on 'solar panel price in Hyderabad' take that high-intent demand.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**GAP**	No Meta Pixel code found in the landing-page source - ad clicks cannot be measured or retargeted.
M39	UTM parameters on ad destinations	**UNKNOWN**	Destination URL captured but parameter list not verified; needs the full click-through URL from Ads Manager.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**UNKNOWN**	Ad copy could not be read for these ads.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**OK**	Live creatives include recent launches (newest started Oct 13, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	**GAP**	A single live ad - no internal comparison, no safety net if it fatigues.
M18	Campaign objective alignment	**OK**	Ad CTA and destination agree on one job: Instagram profile (off-site social).

ID	Control	Status	Evidence read live
M33	Advantage+ Placements	UNKNOWN	Placement automation state is account-only.
M28	Creative fatigue detection	UNKNOWN	Frequency and performance decay need account metrics.

Control review result: 2 OK · 3 gaps · 10 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

Competitor ad activity

who is buying attention in your market

Not checked in this pass. Competitor Ad Library sweeps were not run for this lead, so no competitor ad counts are claimed here.

Every live ad, in full

the evidence, unedited

Below is the complete text of every live ad exactly as the Meta Ad Library shows it, next to the library ID that opens it. Nothing here is summarised.

Library ID	Running since	Destination	Ad copy, verbatim from the Ad Library
2046407626037554 Rayzon Solar	Oct 13, 2026	Instagram profile (instagram.com/rayzon_solar)	Scheme-branded creative reading 'PM Surya Ghar', linking to the Rayzon Solar Instagram profile.

Ad promise vs the page they land on

the fastest thing you can check yourself

What the live ad promises	What the landing page actually shows (read live)
Ad: 'Rayzon Solar' rooftop ad, clicking through to instagram.com	The click never reaches rayzonsolar.com at all - it lands on Instagram, so the site's contact form, its four JSON-LD blocks and its Tawk.to live chat are all invisible to paid traffic. Neither destination can be measured, because no pixel of any kind is installed on the site.
Ad: contact / enquiry intent	The page answers it well once a visitor arrives: tel:+919638000461 and tel:18001231232, a contact form with Submit, and a live Tawk.to chat widget. The gap is purely that nothing sends paid traffic there.

Website tracking & pixels

can you measure anything at all?

Meta Pixel (Facebook / Instagram ads)	MISSING	Google Ads conversion tag	MISSING
Google Analytics (GA4)	MISSING	Google Analytics (old version)	MISSING
LinkedIn Insight Tag	MISSING	Microsoft Clarity (heatmaps)	MISSING

Hotjar (heatmaps)	MISSING	Google Tag Manager	MISSING

8 of 8 tracking tools are missing. Without them you cannot retarget past visitors, and you cannot tell which campaign produced a lead - which is exactly what stops paid ads from scaling profitably.

Conversion readiness

how easily a visitor becomes an enquiry

Contact form on homepage	OK	Click-to-call phone number	OK
WhatsApp chat link	MISSING	Call-to-action buttons: 5 on homepage	OK
Live chat / chatbot	OK	Popup or offer capture	MISSING
Testimonials / social proof	MISSING	Pricing information visible	MISSING

What is already working

- OK Contact form exists
- OK Good CTA presence (5 buttons)
- OK Live chat present

Technical snapshot

SSL / HTTPS	Yes
Server response time	Not checked in this pass
Mobile page speed	Not available at audit time (API returned 429)
Largest contentful paint	Not available at audit time
Page title	Rayzon Solar | Contact Us
Meta description	Present
H1 headline	Let's get in touch
Structured data (Schema)	Present
Open Graph tags	Present
Images on homepage	5 total on the page read, 2 missing alt text
Indexed pages (sitemap)	Not checked in this pass
Google Maps / local SEO	No Google Maps embed found on the page read

Recommended next steps

your 30-day action plan

1	**Turn on measurement (GA4)** Install Google Analytics 4 through Tag Manager - until this exists you cannot tell which marketing works.
2	**Add the Google Ads conversion tag** Required before spending on Google Ads - otherwise every rupee is untracked.
3	**Install the Meta Pixel** Unlocks retargeting ads to people who already visited your site - the cheapest leads you can buy.

4 **Fix 2 images missing alt text**
A one-hour fix that improves Google rankings and image-search traffic.

How every number in this report was verified

so you can re-check any line yourself

Nothing in this report is estimated, illustrative or filled in. Every figure above was read off a live page or the Ad Library on the date shown, and the checks that could not be run are listed as not run rather than guessed.

What was checked	Where the number came from	Read on
Live ads, library IDs, start dates, ad copy	Meta Ad Library (India, active ads) - every ID opened directly	2026-10-25
Page source, script tags, pixels, JSON-LD, consent mode	W3C Nu HTML Checker (showsource=yes) + direct page fetch	2026-10-25
Headings, CTAs, forms, testimonials, pricing	Direct page fetch, plus the wp-json REST API on WordPress builds	2026-10-25
HTML / CSS error and warning counts	W3C Nu HTML Checker message list	2026-10-25
Mobile page speed and Largest Contentful Paint	NOT AVAILABLE - keyless PageSpeed API returned 429. No speed figure is claimed anywhere in this report.	not run
Google Ads Transparency advertiser record	NOT CHECKED - the centre was not queried, so no Google Ads activity is claimed here.	not run
Competitor ad activity and ad counts	NOT CHECKED - no Ad Library sweeps were run for this lead.	not run
Sitemap page count and indexed pages	NOT CHECKED - the sitemap was not fetched.	not run
Server response time	NOT CHECKED - not measured.	not run
