LIVE AD ACTIVITY

Hydromo

Hyderabad · https://hydromo.in/ · Ad data pulled 2026-10-23

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-23. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for Hydromo is produced with:
python run_pipeline.py https://hydromo.in/ "Hydromo" --city Hyderabad

Executive summary. Hydromo - a water and wastewater treatment company by core trade - is running 2 active commercial-solar ads into Andhra Pradesh and Telangana, started 9 September and 11 October 2026. The newest click lands on an fb.me link inside Facebook; the site's own solar pages (solar-commercial, renewable-energy-solutions, solar-panel-installation-in-hyderabad) never see the paid traffic. No Google Ads advertiser record was checked for this report - that requires the full pipeline.

Hydromo
Running since **Sep 9, 2026** (45 days) | Library ID 1107398778509314
"Same grid. Different decision. Commercial solar cuts electricity costs by 70-80%. Free site assessment across AP & Telangana."
Open the live ad

Hydromo
Running since **Oct 11, 2026** (13 days) | Library ID 2409434686477632
"Running a cold storage, rice mill or food processing business? Then you already know how quickly electricity costs can add up. Refrigeration, processing and production demand consistent power every day. Hydromo Solar helps high-consumption businesses generate their own electricity. Explore commercial solar solutions built for energy-intensive operations. Creative line: 'Built For High-Power Busin
Open the live ad

Where your ad clicks land

the funnel behind the spend

Destination type	Facebook Messenger link (fb.me)
Destination	fb.me 'Get quote' (inside Facebook)

What that means	The commercial-solar click opens Facebook, not hydromo.in. The site's solar service pages, its free-consultation form and its client proof stay invisible to the spend, and nobody who clicks without enquiring can be retargeted.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**UNKNOWN**	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	**GAP**	Live ads click to a Facebook lead form (fb.me) - traffic never reaches a page you own, so no URL can carry UTMs and click data stays inside Meta.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**UNKNOWN**	Ad copy could not be read for these ads.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**OK**	Live creatives include recent launches (newest started Sep 9, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	**OK**	2 distinct live ads visible - a comparison is at least possible.
M18	Campaign objective alignment	**OK**	Ad CTA and destination agree on one job: Facebook Messenger link (fb.me).
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.
M28	Creative fatigue detection	**UNKNOWN**	Frequency and performance decay need account metrics.

Control review result: 3 OK · 2 gaps · 10 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

What I found

read live, not guessed

- ! Solar is a division of a water-treatment company - the site's own title is 'Best Water Treatment and Waste Water Management Company in India' - yet it is buying commercial-solar ads across AP & Telangana. The ads and the site's centre of gravity do not match, and a buyer comparing vendors will notice.
- ! Both solar ads route to fb.me links; hydromo.in's solar pages (solar-commercial, renewable-energy-solutions, solar-panel-installation-in-hyderabad) and its free-consultation form never see the paid click.
- ! The trust assets are enormous and unused in the ads: Toyota, ITC, Larsen & Toubro, TATA, GMR, Dr Reddy's, HPCL, Cyient, Avantel, GVK, Auro Realty, DPS and Ankura Hospital logos, plus IGBC and ISO certification and 2025 sustainability awards.
- ! Two solar ads only (9 Sep, 11 Oct), both commercial. Residential rooftop - where the Rs. 78,000 PM Surya Ghar subsidy drives most Hyderabad demand - has no creative at all.
- ! The site runs an active technical blog (hybrid solar sizing, cost and payback; STP electricity consumption) - real expertise that could feed retargeting content nobody is currently being retargeted into.

Recommended next steps

what I would do first

1	**Give the solar division its own front door** Build a solar-first landing page on hydromo.in for the AP & Telangana commercial offer, with the Meta Pixel, and point both ads at it - so the division does not borrow trust from a water-treatment homepage.
2	**Spend the client list in the creative** Toyota, ITC, L&T, TATA, GMR, Dr Reddy's - one line of named industrial references in a cold-storage or food-processing ad outperforms any generic savings claim.
3	**Open the residential angle** One residential creative built around the Rs. 78,000 PM Surya Ghar subsidy would test a market your two commercial-only ads never touch.
4	**Turn the blog into retargeting fuel** The hybrid-solar sizing/payback guide is exactly the content a clicked but unconverted commercial buyer should be retargeted with - once a pixel gives you that audience.
