LIVE AD ACTIVITY

PMP Solar Power

Hyderabad · https://pmpsolar.com/ · Ad data pulled 2026-10-23

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-23. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for PMP Solar Power is produced with:
python run_pipeline.py https://pmpsolar.com/ "PMP Solar Power" --city Hyderabad

Executive summary. PMP Solar Power is running 1 active Meta ad, started 9 October 2026, with the most concrete pricing in this lead set: 3 kW at Rs. 2,10,000 and 5 kW at Rs. 3,10,000, subsidy-inclusive, fixed festive pricing, Hyderabad homes only. The click lands on an fb.me link inside Facebook, so the spend never reaches pmpsolar.com. No Google Ads advertiser record was checked for this report - that requires the full pipeline.

PMP Solar Power
Running since **Oct 9, 2026** (15 days) | Library ID 29275328785392295

"Hyderabad homeowners - this Dasara x Diwali, make the switch to solar. Rs. 20,000 cash reward on 5 kW; Rs. 15,000 cash reward on 3 kW; 3 kW: Rs. 2,10,000; 5 kW: Rs. 3,10,000. Prices inclusive of Rs. 78,000 PM Surya Ghar subsidy. Fixed festive pricing. No negotiation. For Hyderabad homes only. Call / WhatsApp 7032467979 or check pmpsolar.com. Creative line: 'Rs. 20,000 Cash Reward on 5 kW Solar |

Open the live ad

Where your ad clicks land

the funnel behind the spend

Destination type	Facebook Messenger link (fb.me)
Destination	fb.me 'Get quote' (inside Facebook)
What that means	The click opens Facebook, not pmpsolar.com. The fixed festive pricing that makes the ad credible has no page to live on, no form to capture the enquiry, and no pixel to measure or retarget with.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**UNKNOWN**	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	**GAP**	Live ads click to a Facebook lead form (fb.me) - traffic never reaches a page you own, so no URL can carry UTMs and click data stays inside Meta.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**GAP**	Only 2 offer angle in live copy (government subsidy, subsidy amount) - every ad says the same thing.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR1	Creative freshness	**OK**	Live creatives include recent launches (newest started Oct 9, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	**GAP**	A single live ad - no internal comparison, no safety net if it fatigues.
M18	Campaign objective alignment	**OK**	Ad CTA and destination agree on one job: Facebook Messenger link (fb.me).
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.
M28	Creative fatigue detection	**UNKNOWN**	Frequency and performance decay need account metrics.

Control review result: 2 OK · 4 gaps · 9 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

What I found

read live, not guessed

! The one live ad sends the click to an fb.me link inside Facebook - pmpsolar.com, its 36 documented projects and its quote form never see the paid traffic.

- ! The ad's fixed festive pricing (3 kW Rs. 2.10L / 5 kW Rs. 3.10L, subsidy-inclusive, 'no negotiation') is the sharpest offer in this lead set - and today there is nowhere on your own site that a clicker can land and act on it.
- ! The site's proof is strong and invisible to the ad: 36 projects delivered, 420 kW solar installed, 24 localities served, largest single plant 230 kW (D-Mart, Manneguda), plus named residential installs in Kompally, Bachupally, Alwal, Rampally, Bandlaguda and Nizamabad.
- ! PMP sells three businesses from one Kapra office - Solar, Fabrication and Electrical - but the only creative speaks to homeowners. Commercial and factory buyers (the D-Mart 230 kW audience) have no ad at all.
- ! Enquiries depend on a personal Gmail inbox (sreepooji27@gmail.com) plus +91 70324 67979 / WhatsApp - one mailbox between the ad and the site.

Recommended next steps

what I would do first

1	**Give the festive pricing a page of its own** Build a Dasara-Diwali landing page on pmpsolar.com with the 3 kW / 5 kW fixed prices, the subsidy note, an enquiry form and the Meta Pixel - then point the ad at it.
2	**Run a second creative for commercial buyers** The 230 kW D-Mart plant and the fabrication + electrical divisions are a different product for a different buyer. One ad cannot carry both.
3	**Put the project cards to work** 36 documented installs with locations are real proof. They belong next to the offer on the landing page, not only in the site's project grid.
4	**Move enquiries off a personal inbox** Add a role address (sales@pmpsolar.com or hello@pmpsolar.com) on the domain and point the form and the ad at it, so no enquiry depends on one person's Gmail.
