LIVE AD ACTIVITY

SolarSquare Energy

Hyderabad · https://www.solarsquare.in/rooftop-solar-in-hyderabad-1 · Ad data pulled 2026-10-24

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-24. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for SolarSquare Energy is produced with:
python run_pipeline.py https://www.solarsquare.in/rooftop-solar-in-hyderabad-1 "SolarSquare Energy" --city Hyderabad

Executive summary. SolarSquare Energy is running at least 3 active Meta ads targeting Hyderabad (creatives shared across 2, 6 and 2 ads), started 12, 13 and 16 October 2026. Unlike the local installers, these ads land on a page SolarSquare owns - solarsquare.in/rooftop-solar-in-hyderabad-1 - which carries Hyderabad-specific pricing (2 kW about Rs. 1.07 lakh to 5 kW about Rs. 2.65 lakh with subsidy, dated 01 October 2026), an EMI calculator, a free-consultation form and the GoodZero money-back savings plan. SolarSquare is a national brand (36,000+ homes, 31 cities across 10 states) and the Hyderabad landing page is one of many city pages. No Google Ads advertiser record was checked for this report - that requires the full pipeline.

Where your ad clicks land

the funnel behind the spend

Destination type	Own website landing page
Destination	https://www.solarsquare.in/rooftop-solar-in-hyderabad-1
What that means	The click lands on a page SolarSquare owns and controls, which is the right shape: the page can carry a pixel, UTMs, a form and a testable headline. The open questions public data cannot answer are whether the pixel and UTM scheme are actually installed, and whether the Hyderabad page converts better than the 30 other city pages competing for the same spend.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**UNKNOWN**	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	**UNKNOWN**	Destination URL captured but parameter list not verified; needs the full click-through URL from Ads Manager.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**GAP**	Only 1 offer angle in live copy (social proof) - every ad says the same thing.
M30	Social proof utilization	**OK**	Live ad copy carries a social-proof claim (customer count / testimonial framing).
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**OK**	Live creatives include recent launches (newest started Oct 16, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	**OK**	3 distinct live ads visible - enough running to compare messages against each other.
M18	Campaign objective alignment	**OK**	Ad CTA and destination agree on one job: Own website landing page.
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.
M28	Creative fatigue detection	**UNKNOWN**	Frequency and performance decay need account metrics.

Control review result: 4 OK · 1 gaps · 10 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

What I found

read live, not guessed

- ! The ads land on SolarSquare's own Hyderabad landing page - the only lead in this batch where paid clicks reach a page the advertiser owns and can measure.
- ! Multiple live creatives are running (bill-savings angle, money-back guarantee angle, free-consultation angle), so the account is already testing messages against each other.
- ! The Hyderabad page carries a full pricing table dated 01 October 2026 with a 'subject to change' note - worth confirming those numbers still match current DISCOM charges before the next spend cycle.
- ! The ads captured in these searches are all in English, while most Hyderabad competitors run Telugu-language creatives for the same subsidy audience - a language test is an obvious gap.
- ! Public data cannot show whether the Hyderabad page carries the Meta Pixel and UTM scheme, what the spend is, or which creative is winning - that needs account access and is marked unknown in the control review.

Recommended next steps

what I would do first

1	**Verify pixel + UTM scheme on the Hyderabad page** Confirm the Meta Pixel fires on the Hyderabad landing page and that every ad carries UTMs, so the bill-savings, money-back and free-consultation creatives can be compared against each other on form fills, not clicks.
2	**Run a Telugu creative for the Hyderabad market** Every ad captured is English while local competitors run Telugu subsidy ads - a Telugu version of the strongest creative tests an untapped audience.
3	**Keep the Hyderabad pricing table current** The page's subsidy pricing is dated 01 October 2026 and flagged 'subject to change'; refreshing it (and dating it) keeps the offer credible.
4	**Put the money-back guarantee above the fold** The GoodZero guarantee is the sharpest differentiator in the ad set - the landing page should lead with it, not bury it below the calculator.
