LIVE AD ACTIVITY

Solox Energies

Hyderabad · https://solox.in · Ad data pulled 2026-10-18

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-18. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for Solox Energies is produced with:
python run_pipeline.py https://solox.in "Solox Energies" --city Hyderabad

Executive summary. Solox Energies is running 1 active ad on Meta, started 17 October 2026, with multiple versions of the same creative. It is the only advertiser in this Hyderabad set whose ad sends traffic to its own website - the rest send clicks into Facebook forms.

Where your ad clicks land

the funnel behind the spend

Destination type	Own website
Destination	https://solox.in/ ('Book Now')
What that means	The right structure - the click reaches a page you own. The problem is what that page currently tells a homeowner who just clicked a paid ad.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	UNKNOWN	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	UNKNOWN	Destination URL captured but parameter list not verified; needs the full click-through URL from Ads Manager.
M05	Domain verification	UNKNOWN	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	UNKNOWN	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	OK	4 distinct offer angles in live copy: government subsidy, subsidy amount, free site visit, installation speed.
M30	Social proof utilization	GAP	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	UNKNOWN	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	UNKNOWN	Video performance metrics are account-only.
M31	UGC / social-native content	UNKNOWN	Content style cannot be verified from ad cards alone.
M-CR4	CTR benchmark	UNKNOWN	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR1	Creative freshness	OK	Live creatives include recent launches (newest started Oct 17, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	GAP	A single live ad - no internal comparison, no safety net if it fatigues.
M18	Campaign objective alignment	OK	Ad CTA and destination agree on one job: Own website.
M33	Advantage+ Placements	UNKNOWN	Placement automation state is account-only.
M28	Creative fatigue detection	UNKNOWN	Frequency and performance decay need account metrics.

Control review result: 3 OK · 2 gaps · 10 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

What I found

read live, not guessed

! Your ad points at solox.in - that part is already right, and it is rarer in this market than it should be.

! But the page it lands on still reads '0+ MW' of renewable energy installed, '1+ projects' and '1+ years of cumulative team experience'. A homeowner who just clicked a paid ad reads that as a brand-new company, right next to your Rs. 0-down promise.

! The contact page displays contact@solox.in, but the form's own mailto still points at Sungosolarenergy@gmail.com - a leftover from the site template. Enquiries may not be reaching the inbox you advertise.

! One live ad, one creative, one audience. There is no second angle, no retargeting creative and no test structure behind it.

! Worth keeping: Google Analytics is already installed on the site, so traffic measurement exists - the gap is what happens after the click.

Recommended next steps

what I would do first

1	**Replace the placeholder numbers** Fill in real installed capacity, project count and years of experience - or remove the counters entirely. On a paid landing page, '0+ MW' costs more than it says.
2	**Repoint the enquiry form** Make the form deliver to contact@solox.in and add a backup address, so no paid enquiry can be lost to an old template email.
3	**Build the Rs. 0-down angle into a page** Turn the ad promise into a landing page section: Rs. 0 down, subsidy up to Rs. 78,000 handled end-to-end, free site visit - with the calculator next to it.
4	**Start testing creatives** Run 3-4 versions of the zero-down-payment angle (including Telugu) against the current one. You have analytics in place, so you will actually see the difference.
