LIVE AD ACTIVITY

Sunova Green Energy

Hyderabad · https://sunovagreenenergy.com · Ad data pulled 2026-10-24

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-24. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for Sunova Green Energy is produced with:
python run_pipeline.py https://sunovagreenenergy.com "Sunova Green Energy" --city Hyderabad

Executive summary. Sunova Green Energy is running 1 active Meta ad (Facebook), started 31 August 2026. The ad stacks a Rs. 1,00,000 saving claim - Rs. 78,000 government subsidy plus a Rs. 22,000 discount - with 30-year performance life, 7+ years of experience, 5-year AMC and 'Trusted by 500+ Homes Across Hyderabad'. The click lands on an fb.me lead form inside Facebook, so the spend never reaches sunovagreenenergy.com. The site itself is a WordPress/Elementor build covering residential, commercial and housing-society rooftop solar, on-grid / off-grid / hybrid systems, solar water heaters, fencing and street lights, with a Banjara Hills corporate office and a Gmail contact address. No Google Ads advertiser record was checked for this report - that requires the full pipeline.

Get FREE Site Visit, Installation Guidance & Complete Warranty Support.

Open the live ad

Where your ad clicks land

the funnel behind the spend

Destination type	Facebook lead form (fb.me)
Destination	fb.me (inside Facebook)
What that means	Every click opens a Facebook surface, not sunovagreenenergy.com. You own no pixel on the landing experience, you cannot retarget the people who clicked and did not enquire, and there is no page you can test a different headline or price on. With a single ad live there is also no second creative angle to learn from.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**UNKNOWN**	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	**GAP**	Live ads click to a Facebook lead form (fb.me) - traffic never reaches a page you own, so no URL can carry UTMs and click data stays inside Meta.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**OK**	9 distinct offer angles in live copy: government subsidy, subsidy amount, discount offer, bill savings, warranty, social proof, experience claim, free site visit, installation speed.
M30	Social proof utilization	**OK**	Live ad copy carries a social-proof claim (customer count / testimonial framing).
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR1	Creative freshness	**OK**	Live creatives include recent launches (newest started Aug 31, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	**GAP**	A single live ad - no internal comparison, no safety net if it fatigues.
M18	Campaign objective alignment	**OK**	Ad CTA and destination agree on one job: Facebook lead form (fb.me).
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.
M28	Creative fatigue detection	**UNKNOWN**	Frequency and performance decay need account metrics.

Control review result: 4 OK · 2 gaps · 9 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

What I found

read live, not guessed

- ! The one live ad (since 31 Aug 2026) clicks to an fb.me lead form inside Facebook - the spend never reaches sunovagreenenergy.com, so no pixel, no retargeting pool, no testable landing page.
- ! The ad's claim set (Rs. 78,000 subsidy + Rs. 22,000 discount + 5-year AMC + 500+ homes + 7+ years) is backed by the site's service pages - on-grid, off-grid and hybrid systems, housing-society installs, solar water heaters, fencing, street lights - but the paid traffic never sees any of that proof.
- ! One ad, one angle (subsidy + discount), all cold traffic. There is no retargeting ad behind it and no second creative to test the AMC angle against the subsidy angle.
- ! Contact identity is split: the site publishes a Gmail address (sunovagreenenergy@gmail.com) as the enquiry route while the ad points to an in-Facebook form - an enquiry can land in two places or none.
- ! The ad is 7+ weeks old with no newer creative visible in the Ad Library - a refresh is due before fatigue sets in.

Recommended next steps

what I would do first

1	**Move the click onto a page you own** Point the ad at a dedicated Hyderabad landing page carrying the same Rs. 78,000 + Rs. 22,000 + 5-year AMC offer, an enquiry form and the Meta Pixel - so every click is measurable and retargetable.
2	**Install pixel + conversions API** One pixel plus the Conversions API gives you the audience of everyone who clicked but did not submit the fb.me form - usually 10-20x the people who fill a form.
3	**Test the AMC angle as a second creative** 5-year comprehensive AMC support is a different buying trigger from the subsidy - a second creative tells you which one actually converts.
4	**Publish one inbox everywhere** Route the fb.me form alerts and the site contact address to the same inbox so an enquiry can never sit unread.

Verified contact details

read from the live site / ad

Email	sunovagreenenergy@gmail.com (site contact page)
Phone / WhatsApp	+91 99128 48596 / +91 98497 63391
Address	Corporate Office, Road No-10, Banjara Hills, Hyderabad
Entity	Sunova Green Energy Pvt Ltd - Banjara Hills installer; the ad claims 7+ years of experience and 500+ homes served
Meta page	facebook.com - page ID 61560712570253 ('Sunova Green Energy Private Limited')
Service area	sunovagreenenergy.com - residential, commercial and housing-society rooftop solar; on-grid, off-grid and hybrid; solar water heaters, fencing, street lights
