LIVE AD ACTIVITY

Wisda Energy

Hyderabad · https://wisda.in · Ad data pulled 2026-10-24

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-10-24. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for Wisda Energy is produced with:
python run_pipeline.py https://wisda.in "Wisda Energy" --city Hyderabad

Executive summary. Wisda Energy (Wisda Ventures Pvt Ltd) is running 1 active Meta video ad, started 10 October 2026, offering Hyderabad homeowners a free home survey and subsidy assistance. The click lands on an fb.me lead form inside Facebook, so the spend never reaches wisda.in. The site is a Secunderabad (Tarnaka) office serving Hyderabad with rooftop and ground-mount solar plus AMC, showcases Miyapur installations at 3 kW and 5 kW, claims 1k+ happy customers, and lists TGREDCO empanelment (TSRE240457). No Google Ads advertiser record was checked for this report - that requires the full pipeline.

"Video ad: 'Hyderabad homeowners - Ready to go solar? Own a home in Hyderabad? Go Solar. Save More. Get a FREE home survey and subsidy assistance. Call us at 9100126750.' Creative text: 'Hyderabad Homeowners: Go Solar and Get Subsidy - Reduce your monthly electricity bill with a customized rooftop solar solution. Government subsidy assistance available.'"

Open the live ad

Where your ad clicks land

the funnel behind the spend

Destination type	Facebook lead form (fb.me)
Destination	fb.me (inside Facebook)
What that means	Every click opens a Facebook surface, not wisda.in. You own no pixel on the landing experience, you cannot retarget the people who clicked and did not enquire, and there is no page you can test a different headline or price on. With a single video ad live there is also no second creative angle to learn from.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**UNKNOWN**	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	**GAP**	Live ads click to a Facebook lead form (fb.me) - traffic never reaches a page you own, so no URL can carry UTMs and click data stays inside Meta.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**GAP**	All 1 live ads use a single format (video) - no format variety to test what converts.
M26	Creative concept coverage	**GAP**	Only 2 offer angle in live copy (government subsidy, bill savings) - every ad says the same thing.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**OK**	Live creatives include recent launches (newest started Oct 10, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	**GAP**	A single live ad - no internal comparison, no safety net if it fatigues.
M18	Campaign objective alignment	**OK**	Ad CTA and destination agree on one job: Facebook lead form (fb.me).
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.
M28	Creative fatigue detection	**UNKNOWN**	Frequency and performance decay need account metrics.

Control review result: 2 OK · 5 gaps · 8 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

What I found

read live, not guessed

- ! The one live ad (since 10 Oct 2026) clicks to an fb.me lead form inside Facebook - the spend never reaches wisda.in, so no pixel, no retargeting pool, no testable landing page.
- ! The ad's offer (free home survey + subsidy assistance) is backed on the site by the TGREDCO empanelment number, the Miyapur 3 kW / 5 kW installation case studies and the AMC service line - none of which the paid traffic ever sees.
- ! One video ad, one angle (subsidy assistance), all cold traffic. No retargeting ad behind it and no second creative to test the ground-mount or AMC angles.
- ! Three inboxes are published across the site and the ad (connect@wisda.in plus two Gmail addresses) with two phone numbers - an enquiry can land in any of them.
- ! The ad is the only creative visible in the Ad Library and has been live about two weeks - the account is dependent on one video holding its performance.

Recommended next steps

what I would do first

1	**Move the click onto a page you own** Point the ad at a dedicated Hyderabad landing page carrying the free home survey + subsidy assistance offer, an enquiry form and the Meta Pixel - so every click is measurable and retargetable.
2	**Install pixel + conversions API** One pixel plus the Conversions API gives you the audience of everyone who clicked but did not submit the fb.me form - usually 10-20x the people who fill a form.
3	**Test a second creative around ground-mount and AMC** The site's ground-mount and AMC lines are a separate buying trigger from the subsidy - a second creative tells you which audience converts.
4	**Settle on one inbox and one number** Publish connect@wisda.in and one phone number everywhere (ads, forms, footer) so an enquiry can never sit unread or land on the wrong address.

Verified contact details

read from the live site / ad

Email	connect@wisda.in (site also lists wisdaenergy@gmail.com and wisda.ramesh@gmail.com)
Phone / WhatsApp	+91 91000 47301 / +91 91001 26750 (the ad lists 9100126750)
Address	12-13-1146, Street No 11, Tarnaka, Secunderabad, Hyderabad 500017
Entity	Wisda Ventures Pvt Ltd - TGREDCO-empanelled supplier (TSRE240457); rooftop and ground-mount solar plus AMC; 1k+ customers claimed
Meta page	facebook.com/Wisdaenergy
Service area	wisda.in - Hyderabad and Secunderabad; installations shown at Miyapur (3 kW and 5 kW)

Ready to fix this - and start capturing those leads?

Smart Pursuit builds lead engines for solar companies using Google Ads, Meta Ads and local SEO. Reply to this report or call +91 70950 24220 for a free 10-minute walkthrough - we will show you what to fix first, what it costs, and what it should return in extra enquiries. No pitch, no obligation.
