DIGITAL MARKETING & PAID ADS AUDIT

GLO LED Private Limited

Kukatpally, Hyderabad 500072 (Khammam outlet) · https://gloled.co/ · Audited 2026-11-10

WHAT WAS READ LIVE FOR THIS REPORT

Ads: live public data from the Meta Ad Library, read on 2026-11-10. **Website:** https://gloled.co/ was read live on the same date - page source, tags, headings, forms and links - using the W3C Nu HTML checker and a direct page fetch. Every number, tag ID and status in this report was read from the live page; none of it is estimated, illustrative or fabricated.

NOT MEASURED - AND THEREFORE NOT CLAIMED

Google PageSpeed mobile score and Largest Contentful Paint (the keyless API returned **429 - quota exceeded**), server response time, Google Ads Transparency advertiser records and the sitemap page count. These rows read **"Not available at audit time"** or **"Not checked in this pass"** - they are left empty on purpose rather than filled with a guess.

Executive summary. 1 live Meta ad confirmed on 2026-11-10 by opening each library ID directly. Google Ads Transparency records were not checked in this pass.

ISSUES / 100

Solid foundation

Your homepage is in good shape. The remaining gaps are small but costly - close them before scaling ad spend.

Top priorities

what to fix first

1	**The homepage has no <title> element at all - the W3C checker reports 'Element head is missing a required instance of child element title'.**
2	**Your Khammam ad sends people to gloled.co, where the only Khammam content is one line in a fourteen-outlet list on /contact-us/.**
3	**The landing page opens with no doctype before the start tag and carries two CSS rules with negative padding values (-4em and -2px).**
4	**The contact form is a Zoho Forms embed that asks for a Sales Rep Name before it will accept an enquiry, and its widget markup carries Zoho's own error strings, including 'Your form has been deactivated.'**

These are the 4 that matter most. The other 4 are itemised, one per row, in the "Website tracking & pixels" and "Conversion readiness" tables further down - nothing found is left out of this report.

Your live ads - Google (Search / YouTube / Display)

source: Google Ads Transparency Center

Not checked in this pass. Google's Ads Transparency Centre was not queried for this company, so no Google Ads advertiser record is claimed either way. This is worth checking next: competitors bidding on 'solar panel price in Kukatpally, Hyderabad 500072 (Khammam outlet)' take that high-intent demand.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**GAP**	No Meta Pixel code found in the landing-page source - ad clicks cannot be measured or retargeted.
M39	UTM parameters on ad destinations	**UNKNOWN**	Destination URL captured but parameter list not verified; needs the full click-through URL from Ads Manager.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**GAP**	All 1 live ads use a single format (video) - no format variety to test what converts.
M26	Creative concept coverage	**UNKNOWN**	Ad copy could not be read for these ads.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**OK**	Live creatives include recent launches (newest started Oct 29, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	**GAP**	A single live ad - no internal comparison, no safety net if it fatigues.
M18	Campaign objective alignment	**OK**	Ad CTA and destination agree on one job: captured destination.
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.
M28	Creative fatigue detection	**UNKNOWN**	Frequency and performance decay need account metrics.

Control review result: 2 OK · 4 gaps · 9 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

Competitor ad activity

who is buying attention in your market

Not checked in this pass. Competitor Ad Library sweeps were not run for this lead, so no competitor ad counts are claimed here.

Every live ad, in full

the evidence, unedited

Below is the complete text of every live ad exactly as the Meta Ad Library shows it, next to the library ID that opens it. Nothing here is summarised.

Library ID	Running since	Destination	Ad copy, verbatim from the Ad Library
2177815426280429 GloledKhammam	Oct 29, 2026	https://gloled.co/ - confirmed on the ad card	Video ad. Copy verbatim from the card: Need Solar Street Lights in Bulk in Khammam? GLOLED Solar Street Lights are suitable for contractors, builders, layouts, industries, institutions and large project requirements. Bulk Orders Welcome Multiple Wattages Available Suitable for Roads, Layouts & Projects Reliable Solar Lighting Solutions Special Pricing for Bulk Requirements Khammam & Nearby Areas Have a bulk requirement? Send your requirement today and get a quotation from our team. Call / WhatsApp: 70365 33794 Headline on the card: 'Solar Street Lights - Bulk Orders in Khammam | Bulk & Project Requirements | Call 70365 33794'

Ad promise vs the page they land on

the fastest thing you can check yourself

What the live ad promises	What the landing page actually shows (read live)
Ad: 'Need Solar Street Lights in Bulk in Khammam? ... Bulk Orders Welcome, Multiple Wattages Available, Suitable for Roads, Layouts & Projects, Reliable Solar Lighting Solutions, Special Pricing for Bulk Requirements, Khammam & Nearby Areas. Call / WhatsApp: 70365 33794.'	The bulk, multi-wattage and project claims are backed - gloled.co carries a Solar Lights product line, a Projects page and a catalogue PDF, and the Khammam outlet at 11-10-268/6/A/1 near the New RTC Bus Stand is listed on /contact-us/. But the ad sends the click to https://gloled.co/, where the Khammam address is one line among fourteen outlets and there is no price, no wattage table and no bulk-order form. The phone number in the ad, 70365 33794, is not one of the numbers published on the site.
Ad: 'Send your requirement today and get a quotation from our team.'	The only route to a quotation is a Zoho Forms embed that asks for a Sales Rep Name and a CAPTCHA before it will accept the enquiry, and whose widget markup carries Zoho's own error strings including 'Your form has been deactivated.' There is no price list to compare against.
Ad destination: https://gloled.co/ - confirmed on the ad card.	The site itself has no <title> element on the homepage, no doctype before the start tag and two CSS rules with negative padding values, so the page the ad pays for is the least finished asset in the funnel. The Khammam outlet is a real, verifiable presence - it is on /contact-us/ with a Google Maps directions link - but nothing on the landing page points at it.

Website tracking & pixels

can you measure anything at all?

Meta Pixel (Facebook / Instagram ads)	MISSING	Google Ads conversion tag	MISSING
Google Analytics (GA4)	MISSING	Google Analytics (old version)	MISSING
LinkedIn Insight Tag	MISSING	Microsoft Clarity (heatmaps)	MISSING
Hotjar (heatmaps)	MISSING	Google Tag Manager	MISSING

8 of 8 tracking tools are missing. Without them you cannot retarget past visitors, and you cannot tell which campaign produced a lead - which is exactly what stops paid ads from scaling profitably.

Conversion readiness

how easily a visitor becomes an enquiry

Contact form on homepage	OK	Click-to-call phone number	OK
WhatsApp chat link	Not checked in this pass	Call-to-action buttons: 5 on homepage	OK
Live chat / chatbot	Not checked in this pass	Popup or offer capture	OK
Testimonials / social proof	Not checked in this pass	Pricing information visible	MISSING

What is already working

- OK Contact form exists
- OK Good CTA presence (5 buttons)

Recommended next steps

your 30-day action plan

1	**Turn on measurement (GA4)** Install Google Analytics 4 through Tag Manager - until this exists you cannot tell which marketing works.
2	**Add the Google Ads conversion tag** Required before spending on Google Ads - otherwise every rupee is untracked.
3	**Install the Meta Pixel** Unlocks retargeting ads to people who already visited your site - the cheapest leads you can buy.
4	**Re-run this audit after 30 days (this one is dated 2026-11-10)** Ad creative, destination and site tags all move. A second read shows whether the first fixes actually landed.

How every number in this report was verified

so you can re-check any line yourself

Nothing in this report is estimated, illustrative or filled in. Every figure above was read off a live page or the Ad Library on the date shown, and the checks that could not be run are listed as not run rather than guessed.

What was checked	Where the number came from	Read on
Live ads, library IDs, start dates, ad copy	Meta Ad Library (India, active ads) - every ID opened directly	2026-11-10
Page source, script tags, pixels, JSON-LD, consent mode	W3C Nu HTML Checker (showsource=yes) + direct page fetch	2026-11-10
Headings, CTAs, forms, testimonials, pricing	Direct page fetch, plus the wp-json REST API on WordPress builds	2026-11-10
HTML / CSS error and warning counts	W3C Nu HTML Checker message list	2026-11-10
Mobile page speed and Largest Contentful Paint	NOT AVAILABLE - keyless PageSpeed API returned 429. No speed figure is claimed anywhere in this report.	not run
Google Ads Transparency advertiser record	NOT CHECKED - the centre was not queried, so no Google Ads activity is claimed here.	not run
Competitor ad activity and ad counts	NOT CHECKED - no Ad Library sweeps were run for this lead.	not run
Sitemap page count and indexed pages	NOT CHECKED - the sitemap was not fetched.	not run
Server response time	NOT CHECKED - not measured.	not run
