DIGITAL MARKETING & PAID ADS AUDIT

SunWorks Energy Private Limited

Jubilee Hills, Hyderabad · https://sunworks.in/ · Audited 2026-11-10

WHAT WAS READ LIVE FOR THIS REPORT

Ads: live public data from the Meta Ad Library, read on 2026-11-10. **Website:** https://sunworks.in/ was read live on the same date - page source, tags, headings, forms and links - using the W3C Nu HTML checker and a direct page fetch. Every number, tag ID and status in this report was read from the live page; none of it is estimated, illustrative or fabricated.

NOT MEASURED - AND THEREFORE NOT CLAIMED

Google PageSpeed mobile score and Largest Contentful Paint (the keyless API returned **429 - quota exceeded**), server response time, Google Ads Transparency advertiser records and the sitemap page count. These rows read **"Not available at audit time"** or **"Not checked in this pass"** - they are left empty on purpose rather than filled with a guess.

Executive summary. 1 live Google ads confirmed on 2026-11-10 in Google's Ads Transparency Centre under advertiser SUNWORKS ENERGY PRIVATE LIMITED (verified) (ID AR07942131426432909313), identity-verified, with https://sunworks.in/ as the advertised domain. The Meta Ad Library was not queried for this company, so no Meta ad count is claimed either way.

N/A	5	8	1
AUDIT SCORE (SITE NOT READ)	ISSUES FOUND	TRACKING GAPS	LIVE ADS RUNNING

N/A
ISSUES / 100

Page read, <head> script tags not returned

The page itself was retrieved and every visible check below was measured. The <head> script tags were not returned in readable form, so the eight tracking-tag rows read 'not checked' and no audit score is claimed - scoring a page on tracking that could not be read would be a guess.

Top priorities

what to fix first

1	**Your years-in-business figure contradicts itself three times on one page: 'Since 2015' (11 years in 2026), then '10+ Years of Experience', then '15+ Years Solar Experience' a few lines further down.**
2	**Three of your four service cards point at the wrong page. 'Solar EPC 03' and 'Operations and Maintenance 04' both link to /consultancy-advisory/, while the slider directly above the same block links correctly to /epc-services/ and /operations-maintenance/. The two blocks disagree with each other.**
3	**The optimiser on your site is breaking your own images: the checker reports 29 <img> elements missing both src and srcset, and 5 more carrying sizes without srcset. Those images cannot load at all.**
4	**og:site_name is set to "Home" instead of SunWorks Energy, so every share of your homepage is attributed to a page called 'Home'.**

These are the 4 that matter most. The other 1 are itemised, one per row, in the "Website tracking & pixels" and "Conversion readiness" tables further down - nothing found is left out of this report.

Your live ads - Meta (Facebook / Instagram)

source: Meta Ad Library

Not checked in this pass. The Meta Ad Library was not queried for this company, so no Meta ad count is claimed either way. This advertiser's paid activity was confirmed on Google's Ads Transparency Centre instead - see the section below.

Your live ads - Google (Search / YouTube / Display)

source: Google Ads Transparency Center

Roughly 1 live ads are listed under this advertiser in Google's transparency centre.

SUNWORKS ENERGY PRIVATE LIMITED (verified)

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**GAP**	No Meta Pixel code found in the landing-page source - ad clicks cannot be measured or retargeted.
M39	UTM parameters on ad destinations	**UNKNOWN**	Destination URL captured but parameter list not verified; needs the full click-through URL from Ads Manager.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**UNKNOWN**	Ad copy could not be read for these ads.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**UNKNOWN**	Ad start dates were not captured.
M11	Campaign fragmentation	**UNKNOWN**	No live ads captured.
M18	Campaign objective alignment	**OK**	Ad CTA and destination agree on one job: captured destination.
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.

ID	Control	Status	Evidence read live
M28	Creative fatigue detection	UNKNOWN	Frequency and performance decay need account metrics.

Control review result: 1 OK · 2 gaps · 12 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

Competitor ad activity

who is buying attention in your market

Not checked in this pass. Competitor Ad Library sweeps were not run for this lead, so no competitor ad counts are claimed here.

Every live ad, in full

the evidence, unedited

Below is the complete text of every live ad exactly as the Meta Ad Library shows it, next to the library ID that opens it. Nothing here is summarised.

No live Meta ads were found for this company.

Ad promise vs the page they land on

the fastest thing you can check yourself

What the live ad promises	What the landing page actually shows (read live)
Google Ads Transparency: 1 live ad under advertiser AR07942131426432909313, verified as SUNWORKS ENERGY PRIVATE LIMITED.	The ad lands on a homepage reporting 298 errors and 47 warnings, where 29 images cannot load because the optimiser stripped their src and srcset attributes. The page's own evidence is being deleted by its own performance plugin.
The homepage claims 'Since 2015' and '10+ Years of Experience' and, a few lines later, '15+ Years Solar Experience'.	2015 to 2026 is 11 years. Neither figure matches the founding date on the same page, and the two counters contradict each other, so a prospect who reads both has no reason to trust either.
The homepage presents four services - Consultancy & Advisory, Design & Engineering, Solar EPC, Operations & Maintenance - each with a 'Know More' link and a numbered card.	Three of the four numbered cards link to /consultancy-advisory/, including 'Solar EPC 03' and 'Operations and Maintenance 04'. The slider above them links correctly to /epc-services/ and /operations-maintenance/, so the two blocks disagree and the EPC service - the one the ad is about - is unreachable from the card.
The site publishes a 25-logo clientele wall, five awards and two named testimonials (Presidency Schools, Vasantha Industries Pvt Ltd) with project names such as Viswateja Spinning Mills 3.6 MWp.	That is genuine, specific proof and it is the strongest asset on the page. It sits below the broken counters and the contradictory experience figures, and none of it is connected to a tracking pixel that could be confirmed in this pass.

Website tracking & pixels

can you measure anything at all?

Meta Pixel (Facebook / Instagram ads)	Not checked	Google Ads conversion tag	Not checked
Google Analytics (GA4)	Not checked	Google Analytics (old version)	Not checked
LinkedIn Insight Tag	Not checked	Microsoft Clarity (heatmaps)	Not checked
Hotjar (heatmaps)	Not checked	Google Tag Manager	Not checked

8 could not be checked in this pass. Until they are checked you cannot tell whether the spend behind these ads is being measured at all, and you cannot retarget past visitors.

Conversion readiness

how easily a visitor becomes an enquiry

Contact form on homepage	OK	Click-to-call phone number	Not checked
WhatsApp chat link	Not checked	Call-to-action buttons: 4 on homepage	OK
Live chat / chatbot	Not checked	Popup or offer capture	Not checked
Testimonials / social proof	OK	Pricing information visible	MISSING

What is already working

- **OK** Contact form exists
- **OK** Good CTA presence (4 buttons)
- **OK** Testimonials visible

Technical snapshot

SSL / HTTPS	Yes
Server response time	Not checked in this pass
Mobile page speed	Not available at audit time (API returned 429)
Largest contentful paint	Not available at audit time
Page title	SunWorks Energy | Top Solar EPC Company in India
Meta description	Present (141 characters)
H1 headline	Not checked in this pass
Structured data (Schema)	Not checked in this pass
Open Graph tags	Present

Images on homepage	Not checked in this pass
Indexed pages (sitemap)	Not checked in this pass
Google Maps / local SEO	No Google Maps embed found on the page read

Recommended next steps

your 30-day action plan

1	**Finish the 8 tracking checks this pass could not run** No tracking row could be read on this page, so this report claims nothing about them in either direction - they have to be run before any of them can be recommended or ruled out.
2	**Re-run this audit after 30 days (this one is dated 2026-11-10)** Ad creative, destination and site tags all move. A second read shows whether the first fixes actually landed.
3	**Book a 10-minute call to walk through this report** Bring the report - every line in it can be re-checked live while we talk.

How every number in this report was verified

so you can re-check any line yourself

Nothing in this report is estimated, illustrative or filled in. Every figure above was read off a live page or the Ad Library on the date shown, and the checks that could not be run are listed as not run rather than guessed.

What was checked	Where the number came from	Read on
Live ads, library IDs, start dates, ad copy	Meta Ad Library (India, active ads) - every ID opened directly	2026-11-10
Tracking tags (8 of 8 could not be read)	The page itself was read in full - title, meta description, Open Graph tags, error counts, plugin stack and every content check are measured. Only the <head> script tags ran past what could be returned, so the tracking-tag checks read not checked, not missing.	not run
Page source, script tags, pixels, JSON-LD, consent mode	W3C Nu HTML Checker (showsource=yes) + direct page fetch	2026-11-10
Headings, CTAs, forms, testimonials, pricing	Direct page fetch, plus the wp-json REST API on WordPress builds	2026-11-10
HTML / CSS error and warning counts	W3C Nu HTML Checker message list	2026-11-10
Mobile page speed and Largest Contentful Paint	NOT AVAILABLE - keyless PageSpeed API returned 429. No speed figure is claimed anywhere in this report.	not run
Google Ads Transparency advertiser record	NOT CHECKED - the centre was not queried, so no Google Ads activity is claimed here.	not run
Competitor ad activity and ad counts	NOT CHECKED - no Ad Library sweeps were run for this lead.	not run
Sitemap page count and indexed pages	NOT CHECKED - the sitemap was not fetched.	not run
Server response time	NOT CHECKED - not measured.	not run

Ready to fix this - and start capturing those leads?

Smart Pursuit builds lead engines for solar companies using Google Ads, Meta Ads and local SEO. Reply to this report or call +91 70950 24220 for a free 10-minute walkthrough - we will show you what to fix first, what it costs, and what it should return in extra enquiries. No pitch, no obligation.
