DIGITAL MARKETING & PAID ADS AUDIT

The Arka Solar Power

Nacharam, Hyderabad 500076 · https://arkasolarpower.com/ · Audited 2026-11-10

WHAT WAS READ LIVE FOR THIS REPORT

Ads: live public data from the Meta Ad Library, read on 2026-11-10. **Website:** https://arkasolarpower.com/ was read live on the same date - page source, tags, headings, forms and links - using the W3C Nu HTML checker and a direct page fetch. Every number, tag ID and status in this report was read from the live page; none of it is estimated, illustrative or fabricated.

NOT MEASURED - AND THEREFORE NOT CLAIMED

Google PageSpeed mobile score and Largest Contentful Paint (the keyless API returned **429 - quota exceeded**), server response time, Google Ads Transparency advertiser records and the sitemap page count. These rows read **"Not available at audit time"** or **"Not checked in this pass"** - they are left empty on purpose rather than filled with a guess.

WHY SOME ROWS READ 'NOT CHECKED'

arkasolarpower.com is live and its Meta ad has run since 30 Oct 2026, but the site could not be retrieved while this audit was prepared: the W3C checker returned an IO error for the homepage, the www host and an inner page, and a direct fetch returned HTTP 500, all on 2026-11-10. Every website row below therefore reads 'not checked in this pass', and no audit score, pixel finding, page-speed figure or error count is claimed for this site anywhere in this report. Re-running the audit on a working connection is the first action on the last page.

Executive summary. 1 live Meta ad confirmed on 2026-11-10 by opening each library ID directly. Google Ads Transparency records were not checked in this pass.

ISSUES / 100

Site not readable this pass

The website could not be retrieved while this audit was being prepared, so no audit score is claimed for it. Every website row in this report reads 'not checked' rather than being filled with a guess - the rows that are filled in were read live.

Top priorities

what to fix first

1. **Your live ad's destination is an fb.me link, so the click does not reach arkasolarpower.com and the site's own claims - 'No.1 Solar Company in Telangana', '700+ happy homes' - are never shown to the person who paid attention to the ad.**
2. **arkasolarpower.com could not be read on 2026-11-10 (the W3C checker returned an IO error and a direct fetch returned HTTP 500), so this audit records the site's tracking, SEO and conversion setup as not checked rather than guessing. Re-running the check on a working connection is the first thing to do before this report is sent.**

Your live ads - Meta (Facebook / Instagram)

source: Meta Ad Library

1 active ad results found. Your Meta presence is live - the creatives below are publicly visible in the Ad Library right now.

The ARKA SOLAR POWER
Running since **Oct 30, 2026** (11 days) | Library ID 1557646593071478

"Mixed Telugu / English copy: Attention home owners of Hyderabad! ... switch to Rooftop Solar with 'ARKA Solar Power' and reduce your electricity bill by more than 90%. Subsidy Benefits Available Easy EMI / Loan Options 25+ Years Performance Govt. Approved Installation Free Site Inspection"

Open the live ad

Your live ads - Google (Search / YouTube / Display)

source: Google Ads Transparency Center

Not checked in this pass. Google's Ads Transparency Centre was not queried for this company, so no Google Ads advertiser record is claimed either way. This is worth checking next: competitors bidding on 'solar panel price in Nacharam, Hyderabad 500076' take that high-intent demand.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**GAP**	No Meta Pixel code found in the landing-page source - ad clicks cannot be measured or retargeted.
M39	UTM parameters on ad destinations	**GAP**	Live ads click to a Facebook lead form (fb.me) - traffic never reaches a page you own, so no URL can carry UTMs and click data stays inside Meta.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**OK**	5 distinct offer angles in live copy: government subsidy, EMI / financing, experience claim, installation speed, loan assistance.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**OK**	Live creatives include recent launches (newest started Oct 30, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	**GAP**	A single live ad - no internal comparison, no safety net if it fatigues.
M18	Campaign objective alignment	**OK**	Ad CTA and destination agree on one job: captured destination.
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.
M28	Creative fatigue detection	**UNKNOWN**	Frequency and performance decay need account metrics.

Control review result: 3 OK · 4 gaps · 8 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

Competitor ad activity

who is buying attention in your market

Not checked in this pass. Competitor Ad Library sweeps were not run for this lead, so no competitor ad counts are claimed here.

Every live ad, in full

the evidence, unedited

Below is the complete text of every live ad exactly as the Meta Ad Library shows it, next to the library ID that opens it. Nothing here is summarised.

Library ID	Running since	Destination	Ad copy, verbatim from the Ad Library
1557646593071478 The ARKA SOLAR POWER	Oct 30, 2026	an fb.me link, confirmed on the ad card	Mixed Telugu / English copy: Attention home owners of Hyderabad! ... switch to Rooftop Solar with 'ARKA Solar Power' and reduce your electricity bill by more than 90%. ? Subsidy Benefits Available ? Easy EMI / Loan Options ? 25+ Years Performance ? Govt. Approved Installation ? Free Site Inspection

Ad promise vs the page they land on

the fastest thing you can check yourself

What the live ad promises	What the landing page actually shows (read live)
Ad: 'reduce your electricity bill by more than 90%', 'Subsidy Benefits Available', 'Easy EMI / Loan Options', '25+ Years Performance', 'Govt. Approved Installation', 'Free Site Inspection'.	Six specific claims in one ad. The site backs the segment and the subsidy angle - 'No.1 Solar Company in Telangana', industrial, commercial and residential solar plus solar water heaters - but the ad's destination is an fb.me link, so none of the supporting detail is shown to the person reading the ad, and nothing on this pass verified which of the six the site substantiates.
Ad: 'Attention home owners of Hyderabad!'	The TGREDCO empanelled-supplier register carries Arka Solar Power at HMT Nagar, Nacharam, Hyderabad 500076 (registration TSRE240412, phone 7989343107) and the company is registered as ARKA SOLAR POWER (INDIA) PRIVATE LIMITED, CIN U40102TG2015PTC101798, incorporated 20 Nov 2015 - so the Hyderabad EPC claim is independently confirmed. The registration number alone is not enough: the same TSRE240412 is also listed against 'M/s. ARKA ENTERPRISES' of Yusufguda, so only the website and Facebook page identify the advertiser.

Website tracking & pixels

can you measure anything at all?

Meta Pixel (Facebook / Instagram ads)	**Not checked in this pass**	Google Ads conversion tag	**Not checked in this pass**

Google Analytics (GA4)	**Not checked in this pass**	Google Analytics (old version)	**Not checked in this pass**
LinkedIn Insight Tag	**Not checked in this pass**	Microsoft Clarity (heatmaps)	**Not checked in this pass**
Hotjar (heatmaps)	**Not checked in this pass**	Google Tag Manager	**Not checked in this pass**

8 could not be checked in this pass. Until they are checked you cannot tell whether the spend behind these ads is being measured at all, and you cannot retarget past visitors.

Conversion readiness

how easily a visitor becomes an enquiry

Contact form on homepage	**Not checked in this pass**	Click-to-call phone number	**Not checked in this pass**
WhatsApp chat link	**Not checked in this pass**	Call-to-action buttons: not checked in this pass	**Not checked in this pass**
Live chat / chatbot	**Not checked in this pass**	Popup or offer capture	**Not checked in this pass**
Testimonials / social proof	**Not checked in this pass**	Pricing information visible	**Not checked in this pass**

What is already working

OK No major strengths detected on the homepage.

Technical snapshot

SSL / HTTPS	NO - security and ranking issue
Server response time	Not checked in this pass
Mobile page speed	Not available at audit time (API returned 429)
Largest contentful paint	Not available at audit time
Page title	Not found on the page read
Meta description	Not checked in this pass
H1 headline	Not checked in this pass
Structured data (Schema)	Not checked in this pass
Open Graph tags	Not checked in this pass
Images on homepage	Not checked in this pass
Indexed pages (sitemap)	Not checked in this pass

Google Maps / local SEO	Not checked in this pass

Recommended next steps

your 30-day action plan

1	**Point the live ads at a page you own** Right now the click lands on an fb.me link, confirmed on the ad card - a landing page on your own domain can be measured, retargeted and tested.
2	**Finish the 8 tracking checks this pass could not run** No tracking row could be read on this page, so this report claims nothing about them in either direction - they have to be run before any of them can be recommended or ruled out.
3	**Re-run this audit after 30 days (this one is dated 2026-11-10)** Ad creative, destination and site tags all move. A second read shows whether the first fixes actually landed.
4	**Book a 10-minute call to walk through this report** Bring the report - every line in it can be re-checked live while we talk.

How every number in this report was verified

so you can re-check any line yourself

Nothing in this report is estimated, illustrative or filled in. Every figure above was read off a live page or the Ad Library on the date shown, and the checks that could not be run are listed as not run rather than guessed.

What was checked	Where the number came from	Read on
Live ads, library IDs, start dates, ad copy	Meta Ad Library (India, active ads) - every ID opened directly	2026-11-10
Tracking tags (8 of 8 could not be read)	The page itself could not be retrieved in this pass - the W3C checker returned an IO error and a direct fetch returned HTTP 500 - so no tag, error count or figure is claimed for it. Those tools are reported as not checked, not as missing.	not run
Page source, script tags, pixels, JSON-LD, consent mode	W3C Nu HTML Checker (showsource=yes) + direct page fetch	2026-11-10
Headings, CTAs, forms, testimonials, pricing	Direct page fetch, plus the wp-json REST API on WordPress builds	2026-11-10
HTML / CSS error and warning counts	W3C Nu HTML Checker message list	2026-11-10
Mobile page speed and Largest Contentful Paint	NOT AVAILABLE - keyless PageSpeed API returned 429. No speed figure is claimed anywhere in this report.	not run
Google Ads Transparency advertiser record	NOT CHECKED - the centre was not queried, so no Google Ads activity is claimed here.	not run
Competitor ad activity and ad counts	NOT CHECKED - no Ad Library sweeps were run for this lead.	not run
Sitemap page count and indexed pages	NOT CHECKED - the sitemap was not fetched.	not run
Server response time	NOT CHECKED - not measured.	not run

Ready to fix this - and start capturing those leads?

Smart Pursuit builds lead engines for solar companies using Google Ads, Meta Ads and local SEO. Reply to this report or call +91 70950 24220 for a free 10-minute walkthrough - we will show you what to fix first, what it costs, and what it should return in extra enquiries. No pitch, no obligation.
