LIVE AD ACTIVITY

Hysun Solar Pvt. Ltd.

Bandlaguda Jagir, Hyderabad · https://www.hysunsolar.com · Ad data pulled 2026-11-14

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-11-14. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for Hysun Solar Pvt. Ltd. is produced with:
python run_pipeline.py https://www.hysunsolar.com "Hysun Solar Pvt. Ltd." --city Bandlaguda Jagir, Hyderabad

Executive summary. Hysun Solar Pvt Ltd is live on both channels - one Google ad behind a verified account (AR08880526109242818561) and Meta ads selling the Rs.78,000 PM Surya Ghar subsidy to Hyderabad homeowners. The split matters: the Google ad points at hysunsolar.com, while every Meta click is captured inside a WhatsApp chat or Facebook lead form. This business was first swept on 2026-10-18 as lead #1 of batch 2 and never promoted into the pipeline; this report closes that gap. The site itself is a largely unmodified template - repeated 'Harness the Sun Get Solar Power Today!' headings and a 'Free contact 24/7' block - and it publishes an Ahmedabad address while the ads target Hyderabad.

1	-	Split - own site on Google, lead form on Meta	Meta

Hysun Solar
Running since **Active 2026-11-14** | Library ID Meta - Library ID not captured

"Meta ads sell PM Surya Ghar Rs.78,000 subsidy rooftop solar for Hyderabad (Suncity, Bandlaguda Jagir, Hyderabad 500091), on-grid / off-grid / hybrid systems and EMI. Every click lands in a WhatsApp chat or Facebook lead form - never on hysunsolar.com. The ad carries +91 7573999960, a different number from the one on the website."

Open the live ad

Where your ad clicks land

the funnel behind the spend

Destination type	Split - own site on Google, lead form on Meta
Destination	hysunsolar.com (Google) / WhatsApp + Facebook lead form (Meta)

What that means	The Google side of the spend is measurable; the Meta side is not. Every Meta rupee ends inside Facebook's form or a WhatsApp thread, so there is no pixel, no retargeting pool and no page to test a different price on.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**UNKNOWN**	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	**GAP**	Live ads click to a Facebook lead form (fb.me) - traffic never reaches a page you own, so no URL can carry UTMs and click data stays inside Meta.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**OK**	3 distinct offer angles in live copy: government subsidy, subsidy amount, EMI / financing.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**OK**	Live creatives include recent launches (newest started Active 2026-11-14) - the account is not running one stale ad forever.
M11	Campaign fragmentation	**GAP**	A single live ad - no internal comparison, no safety net if it fatigues.
M18	Campaign objective alignment	**OK**	Ad CTA and destination agree on one job: Split - own site on Google, lead form on Meta.
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.
M28	Creative fatigue detection	**UNKNOWN**	Frequency and performance decay need account metrics.

Control review result: 3 OK · 3 gaps · 9 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

What I found

read live, not guessed

- ! Meta ads sell the Rs.78,000 subsidy and EMI to Hyderabad homeowners, but every click lands in a WhatsApp chat or Facebook lead form - the Meta spend never reaches hysunsolar.com.
- ! The contact page publishes an Ahmedabad address (10 Radhekrishna Ind Hub, B/H Hinglaj Mata Mandir, Ahmedabad) while the ads target Suncity, Bandlaguda Jagir, Hyderabad 500091. A Hyderabad homeowner checking the site after clicking an ad sees the wrong city.
- ! Three different contact routes are live at once: info@hysunsolar.com on the site, infohysunsolar@gmail.com as the support address on their own Android app (com.HYSUN.HysunSolar), and +91 7573999960 on the Meta ads against +91 7573999966 on the site. Enquiries can land in an inbox nobody watches.
- ! The site is a template with repeated 'Harness the Sun Get Solar Power Today!' headings and a 'Free contact 24/7' block - no project photos, no system sizing table, nothing that qualifies the lead the ads are paying for.
- ! The Android app advertises one-tap service requests, panel cleaning and a dedicated support team - an operational strength that no ad or web page mentions.

Recommended next steps

what I would do first

1	**Send the Meta clicks to a page you own** A dedicated PM Surya Ghar landing page with the subsidy, an enquiry form and the Meta Pixel turns the current lead-form spend into a measurable, retargetable audience.
2	**Fix the city on the contact page** An Ahmedabad address under ads that say Bandlaguda Jagir, Hyderabad costs trust at exactly the moment a homeowner is deciding whether to call.
3	**Consolidate the contact routes** Three addresses and two phone numbers is three chances to miss an enquiry. Point everything at one monitored inbox and one number.
4	**Lead with the service promise** One-tap service requests and panel cleaning are already built into the app. They are the differentiator against every other lead-form advertiser in the Hyderabad feed.
