LIVE AD ACTIVITY

KehanSri Technologies & Service Pvt Ltd

Gachibowli, Hyderabad · https://kehansrisolar.com/ · Ad data pulled 2026-11-14

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-11-14. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for KehanSri Technologies & Service Pvt Ltd is produced with:
python run_pipeline.py https://kehansrisolar.com/ "KehanSri Technologies & Service Pvt Ltd" --city Gachibowli, Hyderabad

Executive summary. KehanSri is the heaviest live Google advertiser found in this sweep: 24 ads in Google's Ads Transparency Centre under a single identity-verified account (AR07894673884648046593), spanning Display image creatives and a YouTube video. The ads point at kehansrisolar.com, so unlike most of the Hyderabad field the spend does reach a page they own. Founded 2016, Gachibowli (Hyderabad 500032) with a registered office in Bhopal, and a 4.9 Google rating across 131 reviews - this is an established operator, not a lead-form-only reseller. No Meta Ad Library record was captured for this report; the evidence here is Google-only.

0	-	Own website	Meta
LIVE ADS RUNNING	LONGEST-RUNNING AD	WHERE CLICKS LAND	SOURCE

Your live ads - Meta (Facebook / Instagram)

source: Meta Ad Library

No active Meta ads were found for this company. Competitors in your city are buying this attention instead - which is itself the finding worth acting on.

Where your ad clicks land

the funnel behind the spend

Destination type	Own website
Destination	kehansrisolar.com
What that means	Every ad click lands on a page they own, which is the right structure - but the site still routes enquiry through a phone number and a form, and four of the five 'Read More' buttons on the homepage point at a staging host, so paid traffic can be sent into a half-finished build.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	UNKNOWN	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	UNKNOWN	Destination URL captured but parameter list not verified; needs the full click-through URL from Ads Manager.
M05	Domain verification	UNKNOWN	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	UNKNOWN	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	UNKNOWN	Ad copy could not be read for these ads.
M30	Social proof utilization	GAP	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	UNKNOWN	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	UNKNOWN	Video performance metrics are account-only.
M31	UGC / social-native content	UNKNOWN	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	UNKNOWN	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	UNKNOWN	Ad start dates were not captured.
M11	Campaign fragmentation	UNKNOWN	No live ads captured.
M18	Campaign objective alignment	OK	Ad CTA and destination agree on one job: Own website.
M33	Advantage+ Placements	UNKNOWN	Placement automation state is account-only.
M28	Creative fatigue detection	UNKNOWN	Frequency and performance decay need account metrics.

Control review result: 1 OK · 1 gaps · 13 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

What I found

read live, not guessed

- ! 24 live Google ads behind one identity-verified account - the largest live Google ad count found in this sweep, and the only Hyderabad solar business here whose spend demonstrably reaches its own domain.
- ! Four of the five homepage 'Read More' buttons point at the staging host www.wpstage.a2hosted.com/1411/kehanSri/ (roof-top, ground-mounted, operation-maintenance, project-management, EPC & development). Paid traffic clicking those buttons leaves the live site entirely.
- ! The 'Know Your Solar Requirement' sizing table still quotes 300 Wp and 320 Wp modules and prices 3 kVA at INR 27,000 annual savings - 2024-era module data on a page doing the qualifying job for the ads.
- ! The site carries real proof the ads do not use: named projects at 50 KW and 45 KW in Hyderabad, a 5 MW Hyderabad plant, 1.5 MW in Kolar (Karnataka), 100 KW in Mumbai and 1 MW in Ujjain, plus a 4.9/131-review Google rating.

! Contact is phone-first (+91 888 628 6000) with info@kehansri.com published only on the contact page - there is no visible form-to-email routing test.

Recommended next steps

what I would do first

1	**Repoint the staging links before you scale spend** Four 'Read More' buttons send paid clicks to www.wpstage.a2hosted.com. Repointing them at the live pages is a five-minute fix that stops leaking the traffic you are already paying for.
2	**Refresh the sizing table** The 300/320 Wp module figures and the INR 27,000-6,75,000 savings column are out of date. Current TOPCon modules change both the panel count and the payback story the table is used to sell.
3	**Put the project list behind the ads** 50 KW and 45 KW Hyderabad installs, 5 MW, 1.5 MW Kolar, 100 KW Mumbai, 1 MW Ujjain and a 4.9/131 rating are the strongest assets on the site and none of them appear in the ad creative.
4	**Add a form that lands in a monitored inbox** Phone-first enquiry plus one buried email address means no record of who clicked and did not call. A form with a confirmed inbox gives you the retargeting pool.

Verified contact details
