LIVE AD ACTIVITY

Mega Solar India (Mega Creations)

Hyderabad · https://megasolarindia.com/ · Ad data pulled 2026-11-14

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-11-14. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for Mega Solar India (Mega Creations) is produced with:

python run_pipeline.py https://megasolarindia.com/ "Mega Solar India (Mega Creations)" --city Hyderabad

Executive summary. Mega Creations trades as Mega Solar India and is running 2 live Google ads behind an identity-verified account (AR09804983159320739841, VELPULA INDIRA NIRMALA). The homepage copy is a genuine Hyderabad residential installer pitch - no-upfront-cost and pay-as-you-save financing, the Rs.78,000 PM Surya Ghar subsidy, 7% loans, 7-day installation, 25-year warranty, 100+ installations and 15+ years, with Waaree, Adani, Premier, Panasonic, Polycab and Microtek named as partners. The reason this lead is blocked rather than emailable is on the contact page: it is an unedited WordPress demo. No Meta Ad Library record was captured for this report.

0	-	WhatsApp chat widget only	Meta
LIVE ADS RUNNING	LONGEST-RUNNING AD	WHERE CLICKS LAND	SOURCE

Your live ads - Meta (Facebook / Instagram)

source: Meta Ad Library

No active Meta ads were found for this company. Competitors in your city are buying this attention instead - which is itself the finding worth acting on.

Where your ad clicks land

the funnel behind the spend

Destination type	WhatsApp chat widget only
Destination	WhatsApp chat widget on megasolarindia.com
What that means	There is no email address, no phone number and no working contact form anywhere on the site. The only way a paid click can become a conversation is the WhatsApp widget - so every lead depends on one channel and nothing is captured in writing.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	UNKNOWN	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	UNKNOWN	Destination URL captured but parameter list not verified; needs the full click-through URL from Ads Manager.
M05	Domain verification	UNKNOWN	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	UNKNOWN	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	UNKNOWN	Ad copy could not be read for these ads.
M30	Social proof utilization	GAP	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	UNKNOWN	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	UNKNOWN	Video performance metrics are account-only.
M31	UGC / social-native content	UNKNOWN	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	UNKNOWN	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	UNKNOWN	Ad start dates were not captured.
M11	Campaign fragmentation	UNKNOWN	No live ads captured.
M18	Campaign objective alignment	OK	Ad CTA and destination agree on one job: WhatsApp chat widget only.
M33	Advantage+ Placements	UNKNOWN	Placement automation state is account-only.
M28	Creative fatigue detection	UNKNOWN	Frequency and performance decay need account metrics.

Control review result: 1 OK · 1 gaps · 13 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

What I found

read live, not guessed

- ! The /contact/ page is an unedited WordPress demo. It publishes info@example.com, enrollment@example.com and collab@example.com, the address 'Demo St, Brooklyn, NY 11223, United States' and the phone +1 123-456-7890, with form fields labelled 'Parent's Name' and 'Questions Parent's' and Infant / Toddler / Preschool options. A homeowner who clicks a paid ad and tries to make contact lands on a preschool enquiry form in Brooklyn.
- ! There is no real email address or phone number anywhere on the site - only a WhatsApp chat widget. Nothing is captured in writing and nothing can be followed up if the chat goes cold.
- ! The homepage promise is strong and unbacked: 'Leading Solar Company in Hyderabad', 100+ installations, 15+ years, certified government vendor, no-upfront-cost and pay-as-you-save - and none of it has a contact route, a project photo or a customer name behind it.
- ! Two live creatives both point at the same landing page, so there is no second page to test a different offer or price against.

! Brand partners are named (Waaree, Adani, Premier, Panasonic, Polycab, Microtek) but no product pages, datasheets or system configurations are linked from the homepage.

Recommended next steps

what I would do first

1	**Replace the demo contact page before anything else** info@example.com, a Brooklyn address, +1 123-456-7890 and a preschool form are what a paid click currently lands on. This is the single highest-value fix on the site and it is a content job, not a development one.
2	**Publish a real phone number and email** A number and an inbox in the header and footer of every page, matching the Google Business listing, is the minimum for a business buying search traffic.
3	**Keep the WhatsApp widget - but add a form** The widget is the only working channel. Adding a name/phone/locality form beside it gives a written record of every enquiry.
4	**Back the 100+ installations claim** Named localities, a few project photos and one or two customer quotes would turn the strongest line on the page into something a buyer can check.

Verified contact details

read from the live site / ad

Email	none published - /contact/ shows info@example.com, enrollment@example.com and collab@example.com
Phone	none published - /contact/ shows +1 123-456-7890
Address (site)	Demo St, Brooklyn, NY 11223, United States
Contact route	WhatsApp chat widget only
Entity	Mega Creations, trading as Mega Solar India
Google Ads	AR09804983159320739841 (VELPULA INDIRA NIRMALA, identity-verified) - 2 live ads
