LIVE AD ACTIVITY

PNR Sunrise Energies Pvt Ltd

Hyderabad (Telangana & Andhra Pradesh) · https://sunriseenergies.in/ · Ad data pulled 2026-11-14

WEBSITE AUDIT NOT RUN

This report covers **live ad activity only**, read from the public Meta Ad Library on 2026-11-14. No website was fetched, so it contains **no audit score, no tracking/pixel findings, no page-speed data and no conversion checklist** - those numbers are only real once the full pipeline runs. The complete report for PNR Sunrise Energies Pvt Ltd is produced with: python run_pipeline.py https://sunriseenergies.in/ "PNR Sunrise Energies Pvt Ltd" --city Hyderabad (Telangana & Andhra Pradesh)

Executive summary. PNR Sunrise Energies ran its first captured ad on 12 November 2026 - two days before this sweep - and it is a channel-partner recruitment ad, not a homeowner offer. That makes them the youngest advertiser in the batch and the only one whose paid message is aimed at the trade. The site behind it is the most complete of the five: a working solar calculator, a six-step process, a project showcase (5 kW Hyderabad, 100 kW Telangana, 500 kW Andhra Pradesh, 10 kW Warangal), three named testimonials and detailed management bios. Google Ads Transparency shows 0 ads for sunriseenergies.in, so Meta is currently their only paid channel.

Genuine products, competitive pricing, expert business support, timely service and delivery, long-term partnership. Hyderabad. Call 6304587145."

Open the live ad

Where your ad clicks land

the funnel behind the spend

Destination type	WhatsApp chat
Destination	api.whatsapp.com / wa.me/+916304587145
What that means	The ad sells a partnership and the click opens a chat. There is no email address anywhere on the site and no form that captures a written enquiry, so the whole funnel is one WhatsApp thread.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**UNKNOWN**	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	**UNKNOWN**	Destination URL captured but parameter list not verified; needs the full click-through URL from Ads Manager.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**UNKNOWN**	Ad copy could not be read for these ads.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**OK**	Live creatives include recent launches (newest started Nov 12, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	**GAP**	A single live ad - no internal comparison, no safety net if it fatigues.
M18	Campaign objective alignment	**OK**	Ad CTA and destination agree on one job: WhatsApp chat.
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.
M28	Creative fatigue detection	**UNKNOWN**	Frequency and performance decay need account metrics.

Control review result: 2 OK · 2 gaps · 11 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

What I found

read live, not guessed

! Every hero counter on the site reads zero: '0+' Projects Delivered, '0 MW' Solar Capacity Installed, '0%' Potential Bill Savings and '0' years of engineering experience - while the same page claims 150+ projects and names management with 35+ years of experience. The page argues against itself.

- ! No email address is published anywhere. Contact is a request-assessment form, wa.me/+916304587145 and tel:+916304587145 - so a partner or homeowner who prefers to write has no route in.
- ! The only live ad recruits channel partners, so nothing in the paid feed is buying homeowner demand - the audience the project showcase and calculator are built for.
- ! Google Ads Transparency shows 0 ads for sunriseenergies.in. All paid presence is one two-day-old Meta creative.
- ! The assets are strong and unused: a working solar savings calculator (Hyderabad, Warangal, Vijayawada, Visakhapatnam), a six-step process, four named projects with capacities and generation figures, and three named testimonials from Hyderabad, Andhra Pradesh and Warangal.

Recommended next steps

what I would do first

1	**Fill in the counters before the next ad runs** '0+ projects', '0 MW' and '0% savings' next to a claim of 150+ projects is the first thing a prospective partner will notice. The numbers already exist in the project showcase - put them in the hero.
2	**Publish an email address** A partnership conversation needs something more durable than a WhatsApp thread. One monitored inbox on the contact section and in the footer.
3	**Run a homeowner campaign alongside the partner ad** The calculator, the project showcase and the subsidy/financing section are all aimed at end customers, and none of them have an ad behind them.
4	**Use the calculator as the landing page** It is the most interactive asset on the site and it captures a monthly bill and a locality - exactly the qualifying data a paid click should produce.

Verified contact details
