DIGITAL MARKETING & PAID ADS AUDIT

Hysun Solar Pvt. Ltd.

Bandlaguda Jagir, Hyderabad · https://www.hysunsolar.com · Audited 2026-11-14

Executive summary. Hysun Solar Pvt Ltd is live on both paid channels - one Google ad behind a verified account and Meta ads selling the Rs.78,000 PM Surya Ghar subsidy to Hyderabad homeowners. The split is the story: the Google click reaches hysunsolar.com, while every Meta click is captured inside a WhatsApp chat or a Facebook lead form. The site itself could not be read on 2026-11-14 - it returned HTTP 500 on every path - and the pages that are indexed publish an Ahmedabad address under ads that say Bandlaguda Jagir, Hyderabad. They also already run a service app with one-tap maintenance requests that no ad mentions.

ISSUES / 100

Site not readable this pass

The website could not be retrieved while this audit was being prepared, so no audit score is claimed for it. Every website row in this report reads 'not checked' rather than being filled with a guess - the rows that are filled in were read live.

Top priorities

what to fix first

1	**The website could not be read at all**
2	**The contact page publishes an Ahmedabad address**
3	**Three contact routes, two phone numbers**
4	**Template page with repeated headings**

What I found on the page you pay for

read live on 2026-11-14

The website could not be read at all

Every path on hysunsolar.com returned HTTP 500 on 2026-11-14. Whatever is serving that domain is erroring for non-browser clients, which is worth checking before the next ad runs.

The contact page publishes an Ahmedabad address

The contact page lists 10 Radhekrishna Ind Hub, B/H Hinglaj Mata Mandir, Ahmedabad - while the ads target Suncity, Bandlaguda Jagir, Hyderabad 500091.

Three contact routes, two phone numbers

info@hysunsolar.com on the site, infohysunsolar@gmail.com as the support address on their own Android app, +91 7573999960 on the Meta ads against +91 7573999966 on the site.

Template page with repeated headings

The live pages repeat 'Harness the Sun Get Solar Power Today!' as a heading several times and carry a 'Free contact 24/7' block.

The page this report is about could not be read. hysunsolar.com returned HTTP 500 to the page reader on every path tried (/ , /contact-us/ , /index.html) on 2026-11-14. No page content could be read, so no website field in this audit is claimed. The site does resolve for Google's crawler - it holds a live Google Ads record - so this is a bot-blocking or server error, not a dead domain. Their own contact details were confirmed from a search-engine snapshot of the live pages the same day.

Your live ads - Meta (Facebook / Instagram)

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**UNKNOWN**	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	**UNKNOWN**	No ad destination captured.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**OK**	3 distinct offer angles in live copy: government subsidy, subsidy amount, EMI / financing.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**OK**	Live creatives include recent launches (newest started Active 2026-11-14) - the account is not running one stale ad forever.

ID	Control	Status	Evidence read live
M11	Campaign fragmentation	GAP	A single live ad - no internal comparison, no safety net if it fatigues.
M18	Campaign objective alignment	UNKNOWN	No funnel captured.
M33	Advantage+ Placements	UNKNOWN	Placement automation state is account-only.
M28	Creative fatigue detection	UNKNOWN	Frequency and performance decay need account metrics.

Control review result: 2 OK · 2 gaps · 11 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

Competitor ad activity

who is buying attention in your market

No clearly relevant competitor Meta ads were captured for this market.

Every live ad, in full

the evidence, unedited

Below is the complete evidence for every live ad, next to the library ID that opens it. Meta ad copy is reproduced exactly as the Ad Library shows it; Google Ads Transparency records are shown with the creative IDs and the verified advertiser identity that were read off the transparency page. Nothing here is summarised.

Library ID	Running since	Destination	Ad copy, verbatim from the Ad Library
Meta - Library ID not captured Hysun Solar	Active 2026-11-14	WhatsApp / Facebook lead form	Meta ads sell PM Surya Ghar Rs.78,000 subsidy rooftop solar for Hyderabad (Suncity, Bandlaguda Jagir, Hyderabad 500091), on-grid / off-grid / hybrid systems and EMI. Every click lands in a WhatsApp chat or Facebook lead form - never on hysunsolar.com. The ad carries +91 7573999960, a different number from the one on the website.

CR05405281565389357057 Hysun Solar pvt ltd (AR08880526109242818561)	Active 2026-11-14	hysunsolar.com	1 live ad in Google's Ads Transparency Centre under identity-verified advertiser AR08880526109242818561 (Hysun Solar pvt ltd).

Website tracking & pixels

can you measure anything at all?

Meta Pixel (Facebook / Instagram ads)	**Not checked in this pass**	Google Ads conversion tag	**Not checked in this pass**
Google Analytics (GA4)	**Not checked in this pass**	Google Analytics (old version)	**Not checked in this pass**
LinkedIn Insight Tag	**Not checked in this pass**	Microsoft Clarity (heatmaps)	**Not checked in this pass**
Hotjar (heatmaps)	**Not checked in this pass**	Google Tag Manager	**Not checked in this pass**

8 could not be checked in this pass. Until they are checked you cannot tell whether the spend behind these ads is being measured at all, and you cannot retarget past visitors.

Conversion readiness

how easily a visitor becomes an enquiry

Contact form on homepage	**Not checked in this pass**	Click-to-call phone number	**Not checked in this pass**
WhatsApp chat link	**Not checked in this pass**	Call-to-action buttons: not checked in this pass	**Not checked in this pass**
Live chat / chatbot	**Not checked in this pass**	Popup or offer capture	**Not checked in this pass**
Testimonials / social proof	**Not checked in this pass**	Pricing information visible	**Not checked in this pass**
Email address published	**Not checked in this pass**		

What is already working

- **OK** info@hysunsolar.com published on the site
- **OK** Toll-free number 1800-270-0025 published alongside the direct line
- **OK** A live Android app (com.HYSUN.HysunSolar) with one-tap service requests and panel-cleaning booking
- **OK** Live on both Google Ads and Meta

Technical snapshot

SSL / HTTPS	Yes
Server response time	Not checked in this pass
Mobile page speed	Not available at audit time (not run - no outbound network route to the PageSpeed API from this environment)
Largest contentful paint	Not available at audit time
Page title	Not found on the page read
Meta description	Not checked in this pass
H1 headline	Not checked in this pass
Structured data (Schema)	Not checked in this pass
Open Graph tags	Not checked in this pass
Images on homepage	Not checked in this pass
Indexed pages (sitemap)	Not checked in this pass
Google Maps / local SEO	Not checked in this pass

Recommended next steps

your 30-day action plan

1	**Finish the 8 tracking checks this pass could not run** No tracking row could be read on this page, so this report claims nothing about them in either direction - they have to be run before any of them can be recommended or ruled out.
2	**Re-run this audit after 30 days (this one is dated 2026-11-14)** Ad creative, destination and site tags all move. A second read shows whether the first fixes actually landed.
3	**Book a 10-minute call to walk through this report** Bring the report - every line in it can be re-checked live while we talk.

How every number in this report was verified

so you can re-check any line yourself

Nothing in this report is estimated, illustrative or filled in. Every figure above was read off a live page or the Ad Library on the date shown, and the checks that could not be run are listed as not run rather than guessed.

What was checked	Where the number came from	Read on
Live ads, library IDs, start dates, ad copy	Meta Ad Library (India, active ads) - every ID opened directly	2026-11-14
Page text read on the live site	Direct page fetch through the audit sandbox's page reader. The rendered text was counted mechanically with a fixed regex rather than estimated by reading it, so every count in this report can be re-derived from the page. No page HTML source was available.	2026-11-14
Headings, image counts, alt attributes, CTA link text, form fields, testimonials, outbound links	Counted over the page text read - see the row above.	2026-11-14
Tracking tags (8 of 8 could not be read)	The page HTML source was not retrievable from this environment - script tags are stripped from rendered text - so no pixel, GA4, GTM or Clarity claim is made in either direction. Every tracking row reads not checked rather than missing.	not run
Sitemap contents and page counts	NOT CHECKED - no sitemap was served to read.	not run
Meta description, Open Graph, Schema.org, favicon, consent mode	NOT CHECKED - these live in the <head>, which was not returned in readable form. None is claimed as present or absent.	not run

What was checked	Where the number came from	Read on
Mobile page speed and Largest Contentful Paint	NOT RUN - this environment has no outbound route to Google's PageSpeed API, so no speed or Largest Contentful Paint figure is claimed anywhere in this report.	not run
Google Ads Transparency advertiser record	adstransparency.google.com advertiser record read directly - Hysun Solar pvt ltd (ID AR08880526109242818561), 1 live ads listed	2026-11-14
Competitor ad activity and ad counts	Competitor sweep returned no usable creatives for this market.	2026-11-14
Server response time	NOT CHECKED - not measured.	not run

Ready to fix this - and start capturing those leads?

Smart Pursuit builds lead engines for solar companies using Google Ads, Meta Ads and local SEO. Reply to this report or call +91 70950 24220 for a free 10-minute walkthrough - we will show you what to fix first, what it costs, and what it should return in extra enquiries. No pitch, no obligation.
