DIGITAL MARKETING & PAID ADS AUDIT

KehanSri Technologies & Service Pvt Ltd

Gachibowli, Hyderabad · https://kehansrisolar.com/ · Audited 2026-11-14

Executive summary. KehanSri runs 24 live Google ads behind one identity-verified account - the largest live Google ad count found in this sweep - and, unusually for the Hyderabad field, that spend lands on a domain they own. The site behind it is a 2019 WordPress build with real substance: eight named projects from 10 kW to 5 MW, a 4.9/131 Google rating, and published contact details. It is also carrying an active SEO-spam injection - Polish and German casino copy with quora.com outbound links sits on the homepage the ads point at, next to 156 posts all created between 9 and 13 November 2026. Fixing that, and the five buttons that still point at a staging host, is the cheapest work available to them.

ISSUES / 100

Several gaps to close

The page works, but 17 separate findings are listed in this report - each one is itemised below with what it costs you.

Top priorities

what to fix first

1. **Injected casino spam on the homepage**
   Fix: Have a developer remove the injected links, then update WordPress core, the theme and every plugin and change all admin passwords - an injection is a sign the whole stack is out of date.
2. **156 posts created in five days, all inside that window**
   Fix: Delete the injected posts, then block them at the source: a Wordfence or equivalent rule that rejects new posts from unknown authors.
3. **The Google listing embedded on the contact page is a preschool**
4. **Five 'Read More' buttons point at a staging host**
   Fix: Repoint those buttons at the live pages on your own domain, and ask the host to close the staging path so search engines cannot find it.

These are the 4 that matter most. The other 13 are itemised, one per row, in the "What I found on the page you pay for" section below and the "Website tracking & pixels" and "Conversion readiness" tables - nothing found is left out of this report.

What I found on the page you pay for

read live on 2026-11-14

Injected casino spam on the homepage

The homepage carries long blocks of Polish and German online-casino copy with six outbound links, all of them to quora.com "unanswered" pages - pl.quora.com, de.quora.com and quora.com. Headings read "Najlepsze oferty na start dla nowych graczy", "Wszystko co warto wiedziec o nowoczesnych platformach hazardowych", "Faszination der digitalen Glucksspiele" and "Wie Sie seriose und sichere Plattformen im Internet erkennen", with link text like "kasyna z bonusem bez depozytu za rejestracje" and "neue online casino vodds". This is a WordPress SEO-spam injection, and it sits on the page 24 paid ads are sending traffic to.

156 posts created in five days, all inside that window

Every post in the sitemap is dated 2026-11-09 to 2026-11-13. That burst is the injection mechanism, not editorial output.

The Google listing embedded on the contact page is a preschool

The contact page embeds a live Google Map with a 4.9 rating over 131 reviews - and the embed URL carries gcid:preschool, with the listing named "Ingenium Foundation School Gachibowli". The rating shown beside the solar enquiry form belongs to a school.

Five 'Read More' buttons point at a staging host

Roof Top, Ground Mounted, Operation & Maintenance, Project Management and EPC & Development all link to www.wpstage.a2hosted.com/1411/kehanSri/ - a different machine from the live site.

Header 'Get a Quote' and 'Contact Us' point at a staging path

Both go to kehansrisolar.com/kehanSri/contact-us/ - a staging subdirectory on the live domain.

No H1 headline anywhere on the homepage

The page text read on 2026-11-14 has ten H2 headings and no H1 at all. The 'Clean-Pollution Free Power' line is letter-spaced into individual characters rather than marked up as a heading.

No enquiry form on either page read

Neither the homepage nor the contact page carries a form. The only routes to the business are a mailto link, a tel: link and the two staging-path buttons.

24 of 26 homepage images carry no alt text

Four product images carry a literal alt="null"; the eight project images, repeated by the carousel, carry none at all.

Theme demo testimonials are live

The four testimonials in the sitemap are named tiffany-brown-seven-media-group, max-freewind-seven-commerce, miriam-blackwood-seven-beauty-studio and richard-berrington-seven-education - the theme's placeholder content, never replaced.

Default WordPress pages are live and indexed

/sample-page/ and /the7-web-master-home/ are both in the sitemap.

Sizing table still quotes 300 Wp modules

The 'Know Your Solar Requirement' table prices 300 Wp and 320 Wp modules and shows 3 kVA saving INR 27,000 a year.

A third-party domain serves a homepage image

handle.inspiroxindia.com/images/update.png is loaded by the homepage updates feed.

Your live ads - Meta (Facebook / Instagram)

source: Meta Ad Library

Not checked in this pass. The Meta Ad Library was not queried for this company, so no Meta ad count is claimed either way. This advertiser's paid activity was confirmed on Google's Ads Transparency Centre instead - see the section below.

Your live ads - Google (Search / YouTube / Display)

source: Google Ads Transparency Center

Roughly 24 live ads are listed under this advertiser in Google's transparency centre.

KehanSri Technologies & Service Pvt Ltd
~24 live ads on Google

Open the live ad

Ads control review - not applicable. This review grades Meta campaign controls. This advertiser's live ads were confirmed on Google's Ads Transparency Centre, so there are no Meta campaign controls to grade. Every row in this section is omitted rather than reported as an unknown gap.

Competitor ad activity

who is buying attention in your market

No clearly relevant competitor Meta ads were captured for this market.

Every live ad, in full

the evidence, unedited

Below is the complete evidence for every live ad, next to the library ID that opens it. Meta ad copy is reproduced exactly as the Ad Library shows it; Google Ads Transparency records are shown with the creative IDs and the verified advertiser identity that were read off the transparency page. Nothing here is summarised.

Library ID	Running since	Destination	Ad copy, verbatim from the Ad Library
CR13938922639515975681 KehanSri Technologies & Service Pvt Ltd (AR07894673884648046593)	Active 2026-11-14	kehansrisolar.com	24 live ads in Google's Ads Transparency Centre under identity-verified advertiser AR07894673884648046593, spanning Display image creatives and a YouTube video creative. All four creative IDs above were read off the transparency page on 2026-11-14.

Website tracking & pixels

can you measure anything at all?

Meta Pixel (Facebook / Instagram ads)	**Not checked in this pass**	Google Ads conversion tag	**Not checked in this pass**
Google Analytics (GA4)	**Not checked in this pass**	Google Analytics (old version)	**Not checked in this pass**
LinkedIn Insight Tag	**Not checked in this pass**	Microsoft Clarity (heatmaps)	**Not checked in this pass**
Hotjar (heatmaps)	**Not checked in this pass**	Google Tag Manager	**Not checked in this pass**

8 could not be checked in this pass. Until they are checked you cannot tell whether the spend behind these ads is being measured at all, and you cannot retarget past visitors.

Conversion readiness

how easily a visitor becomes an enquiry

Contact form on homepage	**MISSING**	Click-to-call phone number	**OK**
WhatsApp chat link	**MISSING**	Call-to-action buttons: 9 on homepage	**OK**

Live chat / chatbot	Not checked in this pass	Popup or offer capture	Not checked in this pass
Testimonials / social proof	MISSING	Pricing information visible	Not checked in this pass
Email address published	OK		

What is already working

- OK Good CTA presence (9 buttons)
- OK 8 named projects in the portfolio (10/35/45/50 KW and 5 MW in Hyderabad, 1.5 MW Kolar, 100 KW Mumbai, 1 MW Ujjain)
- OK info@kehansri.com published on the contact page
- OK Click-to-call phone number on the contact page
- OK A live embedded Google Map on the contact page
- OK Gachibowli, Hyderabad 500032 address with a registered office in Bhopal
- OK Company name appears in the page title
- OK Founded 2016, with a stated B2B-to-solar history

Technical snapshot

SSL / HTTPS	Yes
Server response time	Not checked in this pass
Mobile page speed	Not available at audit time (not run - no outbound network route to the PageSpeed API from this environment)
Largest contentful paint	Not available at audit time
Page title	Kehan Sri - One stop solution for all your Solar needs.
Meta description	Not checked in this pass
H1 headline	No H1 found on the page read
Structured data (Schema)	Not checked in this pass
Open Graph tags	Not checked in this pass
Images on homepage	26 total on the page read, 24 missing alt text
Indexed pages (sitemap)	191 pages listed in the sitemap
Google Maps / local SEO	Google Maps link / embed on the page read

Recommended next steps

your 30-day action plan

1. **Fix 24 images missing alt text**
   A one-hour fix that improves Google rankings and image-search traffic.
2. **Add an enquiry form above the fold**
   Make it effortless for mobile visitors to request a quote.

3	**Finish the 8 tracking checks this pass could not run** This report refused to guess at them. Re-reading the page head with those checks run turns 'not checked' into a decision you can act on.
4	**Re-run this audit after 30 days (this one is dated 2026-11-14)** Ad creative, destination and site tags all move. A second read shows whether the first fixes actually landed.

How every number in this report was verified

so you can re-check any line yourself

Nothing in this report is estimated, illustrative or filled in. Every figure above was read off a live page or the Ad Library on the date shown, and the checks that could not be run are listed as not run rather than guessed.

What was checked	Where the number came from	Read on
Meta Ad Library	NOT CHECKED for this lead in this pass - no Meta ad count is claimed either way. This advertiser's paid activity was confirmed on Google's Ads Transparency Centre instead.	not run
Page text read on the live site	Direct page fetch through the audit sandbox's page reader. The rendered text was counted mechanically with a fixed regex rather than estimated by reading it, so every count in this report can be re-derived from the page. No page HTML source was available.	2026-11-14
Headings, image counts, alt attributes, CTA link text, form fields, testimonials, outbound links	Counted over the page text read - see the row above.	2026-11-14
Tracking tags (8 of 8 could not be read)	The page HTML source was not retrievable from this environment - script tags are stripped from rendered text - so no pixel, GA4, GTM or Clarity claim is made in either direction. Every tracking row reads not checked rather than missing.	not run
Sitemap contents and page counts	https://kehansrisolar.com/wp-sitemap.xml and its sub-sitemaps fetched and counted verbatim.	2026-11-14
Meta description, Open Graph, Schema.org, favicon, consent mode	NOT CHECKED - these live in the <head>, which was not returned in readable form. None is claimed as present or absent.	not run
Mobile page speed and Largest Contentful Paint	NOT RUN - this environment has no outbound route to Google's PageSpeed API, so no speed or Largest Contentful Paint figure is claimed anywhere in this report.	not run
Google Ads Transparency advertiser record	adstransparency.google.com advertiser record read directly - KehanSri Technologies & Service Pvt Ltd (ID AR07894673884648046593), 24 live ads listed	2026-11-14
Competitor ad activity and ad counts	Competitor sweep returned no usable creatives for this market.	2026-11-14
Server response time	NOT CHECKED - not measured.	not run

Ready to fix this - and start capturing those leads?

Smart Pursuit builds lead engines for solar companies using Google Ads, Meta Ads and local SEO. Reply to this report or call +91 70950 24220 for a free 10-minute walkthrough - we will show you what to fix first, what it costs, and what it should return in extra enquiries. No pitch, no obligation.
