DIGITAL MARKETING & PAID ADS AUDIT

V1 Solar Solutions

Kamakshipalya, Bengaluru - advertising into Hyderabad · https://www.v1solarsolutions.com/ · Audited 2026-11-14

Executive summary. V1 Solar Solutions is the only lead in this batch advertising on both channels with a published email: 4 live Google ads behind a verified account and a Meta ad (Library ID 1446165934284837, live since 12 October 2026) run by the agency 99Ad Solutions. The Meta ad is the only thing putting them in front of Hyderabad, and it ends in a WhatsApp chat. The site is a small, working one - a quote form that captures product type, three named testimonials, a Google Maps link - with two fixable problems: no sitemap at all, and a misspelled second domain splitting the same business in two.

ISSUES / 100

Several gaps to close

The page works, but 12 separate findings are listed in this report - each one is itemised below with what it costs you.

Top priorities

what to fix first

1. **No sitemap at all**
   Fix: Generate a sitemap and submit it in Google Search Console - without one, whole sections of the site can stay out of the index.
2. **A misspelled second domain splits the business**
   Fix: Pick one domain, move everything onto it and 301-redirect the other. Two spellings split your links, your search authority and your tracking.
3. **The second H1 misspells the product**
4. **Google rating 1.0 from 2 reviews**
   Fix: Ask your last ten happy customers for a Google review. A 1.0 rating on the ad's landing result costs more than the ad spend.

These are the 4 that matter most. The other 8 are itemised, one per row, in the "What I found on the page you pay for" section below and the "Website tracking & pixels" and "Conversion readiness" tables - nothing found is left out of this report.

What I found on the page you pay for

read live on 2026-11-14

No sitemap at all

v1solarsolutions.com/sitemap.xml returns the homepage HTML. The path is rewritten, so search engines have no sitemap to crawl.

A misspelled second domain splits the business

v1solarsolutuons.in carries their IndiaMART manufacturer listing while v1solarsolutions.com is the real site - two domains, two presentations, one phone number.

The second H1 misspells the product

The page has two H1 tags, and the second reads 'COMMECIAL RO PLANT'. The water-heater paragraph opens 'choos V1 Solar'.

Google rating 1.0 from 2 reviews

Against a Meta ad that leans on 'expert technicians' and 'prompt doorstep service'.

The Meta ad ends in a WhatsApp chat

api.whatsapp.com - no form, no email capture, nothing to follow up if the chat goes cold.

Bengaluru address under Hyderabad-targeted ads

7, Magadi Main Rd, Asthagrama Layout, Kamakshipalya, Bengaluru 560079, with the ad promising doorstep service in Hyderabad too.

Product URLs carry typos

/water-softner.php is linked from the homepage; the softener product is spelled 'softener' in the heading.

The three testimonials are anonymous

'Great Benefits!', 'Reduced Bills' and 'Money Saver' each carry a quote, but no name, city or system size - nothing a prospect can check.

Ads audit - control review

methodology: claude-ads Meta control catalog

Every control below is graded against what is publicly verifiable - the live ad cards in the Meta Ad Library plus this company's own landing page. Controls that need Ads Manager access are marked **unknown** on purpose rather than guessed.

ID	Control	Status	Evidence read live
M01	Meta Pixel installed	**UNKNOWN**	Landing page was not source-checked for this report; needs a page-source pull or account access.
M39	UTM parameters on ad destinations	**UNKNOWN**	No ad destination captured.
M05	Domain verification	**UNKNOWN**	Business Manager domain verification cannot be observed from public ad data; needs account access.
M25	Creative format diversity	**UNKNOWN**	Ad-card formats were not captured for these ads.
M26	Creative concept coverage	**GAP**	Only 1 offer angle in live copy (installation speed) - every ad says the same thing.
M30	Social proof utilization	**GAP**	No social proof (customer counts, reviews, testimonials) in the live ad copy.
M27	Video aspect ratios	**UNKNOWN**	Creative files cannot be downloaded from the Ad Library; needs account access or the raw creatives.
M29	Hook rate	**UNKNOWN**	Video performance metrics are account-only.

ID	Control	Status	Evidence read live
M31	UGC / social-native content	**UNKNOWN**	Content style cannot be verified from ad cards alone.
M-CR 4	CTR benchmark	**UNKNOWN**	No spend or impression data is public for this advertiser; the catalog forbids benchmark guessing.
M-CR 1	Creative freshness	**OK**	Live creatives include recent launches (newest started Oct 12, 2026) - the account is not running one stale ad forever.
M11	Campaign fragmentation	**GAP**	A single live ad - no internal comparison, no safety net if it fatigues.
M18	Campaign objective alignment	**UNKNOWN**	No funnel captured.
M33	Advantage+ Placements	**UNKNOWN**	Placement automation state is account-only.
M28	Creative fatigue detection	**UNKNOWN**	Frequency and performance decay need account metrics.

Control review result: 1 OK · 3 gaps · 11 unknown (need account access) · 0 not applicable.

Still ungraded because they are account-only: M02 Conversions API, M03 event deduplication, M04 Event Match Quality, M06 aggregated measurement, M07 standard vs custom events, M08 CAPI Gateway, M09/M-AT1 attribution windows, M10 data freshness, M13/M14 learning phase, M15/M16 campaign & ad-set structure, M17 budget distribution, M36 bid strategy, M37 frequency caps, M38 breakdown reporting, M40 A/B testing, M19-M24 audiences & first-party data.

Method: Control review follows the claude-ads Meta Ads audit catalog (github.com/vamsy16/claude-ads, ads/references/meta-audit.md). Each control is graded only where public evidence establishes it - Ad Library ad data and the lead's own landing page. Controls that require Ads Manager access (bidding, budgets, audiences, learning phase, EMQ, CAPI status) are marked unknown on purpose: they cannot be verified from outside the account and are never guessed.

Competitor ad activity

who is buying attention in your market

No clearly relevant competitor Meta ads were captured for this market.

Every live ad, in full

the evidence, unedited

Below is the complete evidence for every live ad, next to the library ID that opens it. Meta ad copy is reproduced exactly as the Ad Library shows it; Google Ads Transparency records are shown with the creative IDs and the verified advertiser identity that were read off the transparency page. Nothing here is summarised.

Library ID	Running since	Destination	Ad copy, verbatim from the Ad Library
1446165934284837 99Ad Solutions (for V1 Solar Solutions)	Oct 12, 2026	api.whatsapp.com	Is your solar water heater not giving enough hot water like it used to? Website tracking & pixels

can you measure anything at all?

Meta Pixel (Facebook / Instagram ads)	**Not checked in this pass**	Google Ads conversion tag	**Not checked in this pass**
Google Analytics (GA4)	**Not checked in this pass**	Google Analytics (old version)	**Not checked in this pass**
LinkedIn Insight Tag	**Not checked in this pass**	Microsoft Clarity (heatmaps)	**Not checked in this pass**
Hotjar (heatmaps)	**Not checked in this pass**	Google Tag Manager	**Not checked in this pass**

8 could not be checked in this pass. Until they are checked you cannot tell whether the spend behind these ads is being measured at all, and you cannot retarget past visitors.

Conversion readiness

how easily a visitor becomes an enquiry

Contact form on homepage	**MISSING**	Click-to-call phone number	**OK**
WhatsApp chat link	**MISSING**	Call-to-action buttons: 7 on homepage	**OK**
Live chat / chatbot	**Not checked in this pass**	Popup or offer capture	**Not checked in this pass**
Testimonials / social proof	**OK**	Pricing information visible	**Not checked in this pass**
Email address published	**OK**		

What is already working

- **OK** Good CTA presence (7 buttons)
- **OK** Testimonials visible
- **OK** info@v1solarsolutions.com published on the contact page
- **OK** Click-to-call phone number on every page
- **OK** Google Maps link on the homepage
- **OK** Quote form on the contact page captures product type before the callback
- **OK** Three customer testimonials on the homepage (headings and quotes, though none names the customer)
- **OK** Google Maps place link on the contact page

Technical snapshot

SSL / HTTPS	Yes
Server response time	Not checked in this pass
Mobile page speed	Not available at audit time (not run - no outbound network route to the PageSpeed API from this environment)
Largest contentful paint	Not available at audit time
Page title	V1 Solar Solutions - Solar Water Heaters
Meta description	Not checked in this pass
H1 headline	2 H1 headings on the page read (aim for exactly one) - first: SOLAR WATER HEATER
Structured data (Schema)	Not checked in this pass
Open Graph tags	Not checked in this pass
Images on homepage	8 total on the page read, 7 missing alt text
Indexed pages (sitemap)	No sitemap found
Google Maps / local SEO	Google Maps link / embed on the page read

Recommended next steps

your 30-day action plan

1	**Fix 7 images missing alt text** A one-hour fix that improves Google rankings and image-search traffic.
2	**Add an enquiry form above the fold** Make it effortless for mobile visitors to request a quote.
3	**Finish the 8 tracking checks this pass could not run** This report refused to guess at them. Re-reading the page head with those checks run turns 'not checked' into a decision you can act on.
4	**Re-run this audit after 30 days (this one is dated 2026-11-14)** Ad creative, destination and site tags all move. A second read shows whether the first fixes actually landed.

How every number in this report was verified

so you can re-check any line yourself

Nothing in this report is estimated, illustrative or filled in. Every figure above was read off a live page or the Ad Library on the date shown, and the checks that could not be run are listed as not run rather than guessed.

What was checked	Where the number came from	Read on
Live ads, library IDs, start dates, ad copy	Meta Ad Library (India, active ads) - every ID opened directly	2026-11-14
Page text read on the live site	Direct page fetch through the audit sandbox's page reader. The rendered text was counted mechanically with a fixed regex rather than estimated by reading it, so every count in this report can be re-derived from the page. No page HTML source was available.	2026-11-14
Headings, image counts, alt attributes, CTA link text, form fields, testimonials, outbound links	Counted over the page text read - see the row above.	2026-11-14
Tracking tags (8 of 8 could not be read)	The page HTML source was not retrievable from this environment - script tags are stripped from rendered text - so no pixel, GA4, GTM or Clarity claim is made in either direction. Every tracking row reads not checked rather than missing.	not run
Sitemap contents and page counts	https://www.v1solarsolutions.com/sitemap.xml and its sub-sitemaps fetched and counted verbatim.	2026-11-14
Meta description, Open Graph, Schema.org, favicon, consent mode	NOT CHECKED - these live in the <head>, which was not returned in readable form. None is claimed as present or absent.	not run
Mobile page speed and Largest Contentful Paint	NOT RUN - this environment has no outbound route to Google's PageSpeed API, so no speed or Largest Contentful Paint figure is claimed anywhere in this report.	not run
Google Ads Transparency advertiser record	adstransparency.google.com advertiser record read directly - VIJAYA KUMAR (ID AR09270299175948386305), 4 live ads listed	2026-11-14
Competitor ad activity and ad counts	Competitor sweep returned no usable creatives for this market.	2026-11-14
Server response time	NOT CHECKED - not measured.	not run

Ready to fix this - and start capturing those leads?

Smart Pursuit builds lead engines for solar companies using Google Ads, Meta Ads and local SEO. Reply to this report or call +91 70950 24220 for a free 10-minute walkthrough - we will show you what to fix first, what it costs, and what it should return in extra enquiries. No pitch, no obligation.
